This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## Hydrogen Sulfide Provides Intestinal Protection During A Murine Model of Experimental Necrotizing Enterocolitis

Natalie A. Drucker MD<sup>1,3</sup>, Amanda R. Jensen MD<sup>1,3</sup>, Michael Ferkowicz PhD<sup>1,3</sup>,  
and Troy A. Markel MD<sup>1,2,3</sup>

<sup>1</sup>Department of Surgery, Section of Pediatric Surgery

<sup>2</sup>Riley Hospital for Children at Indiana University Health and

<sup>3</sup>The Indiana University School of Medicine  
Indianapolis, IN

NAD performed animal care and experiments and drafted the manuscript, NAD and ARJ performed histological grading and statistical analysis, NAD performed protein isolation and tissue analysis, MJF prepared histology slides, TAM contributed critical ideas, assistance and manuscript advice. All authors provided critical revisions to the manuscript and assisted with its final preparation.

No disclosures to report.

### KEY WORDS

animal model, necrotizing enterocolitis, hydrogen sulfide, premature, neonatal, intestine, ischemia

This work was made possible with support from:

- 1) KL2TR001106 (A. Shekhar, PI) from the National Institutes of Health, National Center for Advancing Translational Sciences, Clinical and Translational Sciences Award
- 2) Indiana University Health, Indianapolis, IN
