### Accepted Manuscript

Paleosols identified by rock magnetic properties indicate damoutburst events of the Min River, eastern Tibetan Plateau PALAEO ecology 3

Weiming Liu, Peng Cui, Yonggang Ge, Zhiyu Yi

PII: S0031-0182(17)31268-3

DOI: doi:10.1016/j.palaeo.2018.07.029

Reference: PALAEO 8881

To appear in: Palaeogeography, Palaeoclimatology, Palaeoecology

Received date: 18 December 2017

Revised date: 23 July 2018 Accepted date: 28 July 2018

Please cite this article as: Weiming Liu, Peng Cui, Yonggang Ge, Zhiyu Yi, Paleosols identified by rock magnetic properties indicate dam-outburst events of the Min River, eastern Tibetan Plateau. Palaeo (2018), doi:10.1016/j.palaeo.2018.07.029

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
