The Determination of Optimal Treatment Plans for Volumetric Modulated Arc Therapy (VMAT)

Pınar Dursun, Z. Caner Taşkın, İ. Kuban Altınel

PII: S0377-2217(18)30551-4
DOI: [10.1016/j.ejor.2018.06.023](https://doi.org/10.1016/j.ejor.2018.06.023)
Reference: EOR 15208

To appear in: *European Journal of Operational Research*

Received date: 17 May 2017
Revised date: 7 June 2018
Accepted date: 8 June 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Radiation treatment planning model for Volumetric Modulated Arc Therapy
- Integration of both the aperture and radiation intensity at each control point
- Exact solution approaches using Benders decomposition
- Assessments of the solution algorithms on real prostate cancer case data
