This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Presents a systematic mapping on reuse benefits in real-world settings.
- Increased Quality and Increased productivity are the two most reported benefits.
- CBD and SPL are the two most used approaches to software reuse.
- Best results are obtained when systematically approaching software reuse.
