Title: Study of the mechanism by which magnetization reduces dust suppressant usage

Authors: Hetang Wang, Sheng He, Guangran Xie, Xinyi Chen, Botao Qin

PII: S0927-7757(18)30703-9
DOI: <https://doi.org/10.1016/j.colsurfa.2018.08.034>
Reference: COLSUA 22749

To appear in: *Colloids and Surfaces A: Physicochem. Eng. Aspects*

Received date: 2-7-2018
Revised date: 13-8-2018
Accepted date: 13-8-2018

Please cite this article as: Wang H, He S, Xie G, Chen X, Qin B, Study of the mechanism by which magnetization reduces dust suppressant usage, *Colloids and Surfaces A: Physicochemical and Engineering Aspects* (2018), <https://doi.org/10.1016/j.colsurfa.2018.08.034>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Study of the mechanism by which magnetization reduces dust suppressant usage
