This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- We study comovement between stock market volatility and oil market volatility.
- This comovement is time-varying and depends on the time scale.
- It is strong at yearly horizon and weaker at horizons of a few days.
- Stock market implied volatility leads the oil market implied volatility.
