This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

Highlights

- We propose an integrated supply chain network design model that incorporates payment time.
- We make first attempt to minimize the system-wise location, transportation, multi-echelon inventory, and financing costs.
- The impacts of deferred payment time on the associated decisions are examined analytically and numerically.
