Title: Synthesis of cyclodextrin polymers containing glutamic acid and their use for the synthesis of Ag nanoparticles

Authors: Viviane Costa de Souza, Caio H.N. Barros, Ljubica Tasic, Iara F. Gimenez, Zaine Teixeira Camargo

PII: S0144-8617(18)31010-5
DOI: <https://doi.org/10.1016/j.carbpol.2018.08.101>
Reference: CARP 13998

To appear in:

Received date: 5-6-2018
Revised date: 23-8-2018
Accepted date: 24-8-2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Synthesis of cyclodextrin polymers containing glutamic acid and their use for the synthesis of Ag nanoparticles

Viviane Costa de Souza^a, Caio H. N. Barros^b, Ljubica Tasic^b, Iara F. Gimenez^a, Zaine Teixeira Camargo^a

*Corresponding author at Department of Chemistry, Federal University of Sergipe, Av. Marechal Rondon s/n, Cidade Universitária “Prof. José Aloísio de Campos”, 491000-000, São Cristóvão, Sergipe, Brazil.

E-mail address: zaineteixeira@ufs.br (Z. Teixeira)

Highlights

- β -CD crosslinked with citric acid polymer was functionalized with glutamic acid.
- A novel polymer consisting of β -CD crosslinked with glutamic acid was obtained.
