Title: Effect of chemical modification with citric acid on the physicochemical properties and resistant starch formation in different starches

Authors: Rema Remya, Alummoottil N. Jyothi, Janardanan Sreekumar

PII: S0144-8617(18)31038-5
DOI: <https://doi.org/10.1016/j.carbpol.2018.08.128>
Reference: CARP 14025

To appear in:

Received date: 5-5-2018
Revised date: 28-8-2018
Accepted date: 28-8-2018

Please cite this article as: Remya R, Jyothi AN, Sreekumar J, Effect of chemical modification with citric acid on the physicochemical properties and resistant starch formation in different starches, *Carbohydrate Polymers* (2018), <https://doi.org/10.1016/j.carbpol.2018.08.128>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Effect of chemical modification with citric acid on the physicochemical properties and resistant starch formation in different starches
