Full Length Article

Semi-continuous production of iron oxide nanoparticles via membrane emulsification

Maria Medina-Llamas, Davide Mattia

PII: S0169-4332(18)32400-0
DOI: <https://doi.org/10.1016/j.apsusc.2018.08.257>
Reference: APSUSC 40294

To appear in: *Applied Surface Science*

Received Date: 4 July 2018
Revised Date: 14 August 2018
Accepted Date: 30 August 2018

Please cite this article as: M. Medina-Llamas, D. Mattia, Semi-continuous production of iron oxide nanoparticles via membrane emulsification, *Applied Surface Science* (2018), doi: <https://doi.org/10.1016/j.apsusc.2018.08.257>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Semi-continuous production of iron oxide nanoparticles via membrane emulsification

*Maria Medina-Llamas and Davide Mattia**
