This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Review Article

Simulation for Training and Assessment in Hysteroscopy: A Systematic Review

Pietro Gambadauro, MD, MSc (Med Ed), PhD, Milan Milenkovic, MD, PhD, Gergö Hadlaczky, MSc, PhD

From the Department of Learning, Informatics, Management and Ethics (LIME), Karolinska Institutet, Stockholm, Sweden (Drs Gambadauro and Hadlaczky), Res Medica, Gynaecology and Reproductive Medicine, Uppsala, Sweden (Dr Gambadauro), Reproductive Medicine and Gynecology, Karolinska University Hospital, Stockholm, Sweden (Dr Milenkovic); Department of Oncology, Karolinska Institutet, Stockholm, Sweden (Dr Milenkovic).

Corresponding author: Pietro Gambadauro, MD, MSc, PhD. Karolinska Institutet, LIME/NASP-C7, 17177 Stockholm, Sweden; Telephone: +46 (0)768976847; E-mail: pietro.gambadauro@ki.se; gambadauro@gmail.com

Conflict of Interest: PG declares non-financial support to his simulated laparoscopy workshops from Karl Storz Endoskop Sverige AB, Skärholmen, Sweden (box-simulators and laparoscopic equipment) and Ethicon Surgical Care, Sollentuna, Sweden (surgical sutures), outside the submitted work; and has been involved as tutor to the ECRES (ESHRE Certification of Reproductive Endoscopic Surgery) in the past few years. MM and GH have nothing to disclose. Part of the work has been presented in the first author's thesis for the title of MSc in Medical Education, Karolinska Institutet, 2017.

Precis

Hysteroscopy simulation may facilitate technical skills training among novices, but evidence is lacking regarding its value for developing and assessing clinical competence.
