Distribution, partitioning and inhalation exposure of perfluoroalkyl acids (PFAAs) in urban and rural air near Lake Chaohu, China

Wenxiu Liu, Wei He, Jingyi Wu, Wenjing Wu, Fuli Xu

PII: S0269-7491(18)31411-8

DOI: [10.1016/j.envpol.2018.08.052](https://doi.org/10.1016/j.envpol.2018.08.052)

Reference: ENPO 11490

To appear in: *Environmental Pollution*

Received Date: 31 March 2018

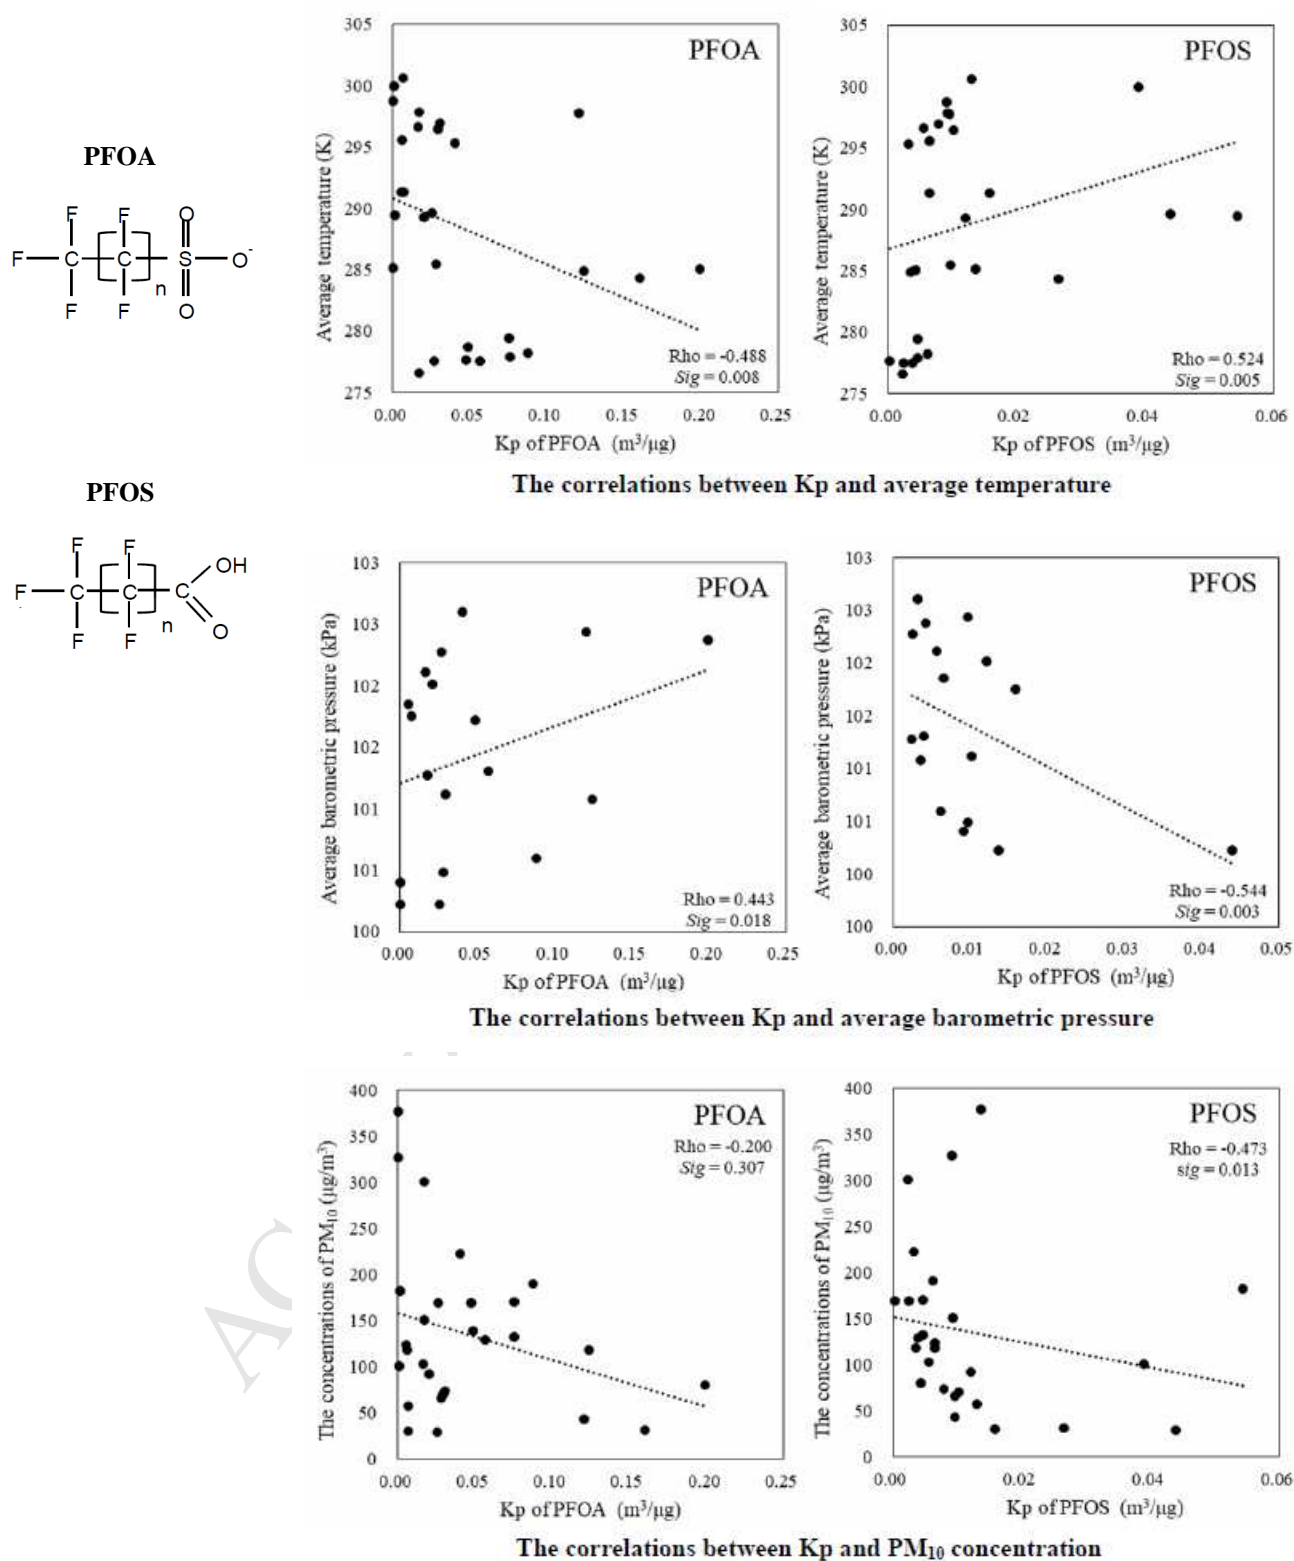

Revised Date: 17 August 2018

Accepted Date: 17 August 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Correlations between the gaseous-particulate partitioning coefficients (K_p) of PFOA and PFOS with the atmosphere environmental conditions such as PM₁₀ concentrations and meteorological conditions (temperature and barometric pressure)
