Full length article

Fine tuning neuronal targeting of nanoparticles by adjusting the ligand grafting density and combining PEG spacers of different length

Carla Pereira Gomes, Victoria Leiro, Cátia Daniela Ferreira Lopes, Ana Patrícia Spencer, Ana Paula Pêgo

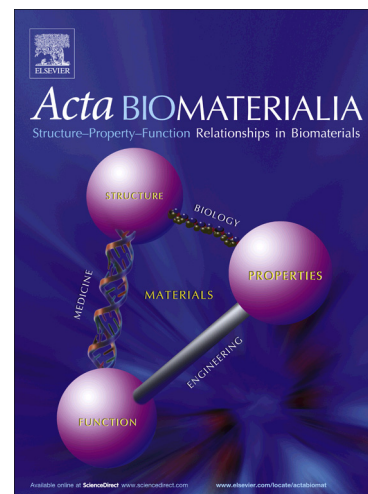

PII: S1742-7061(18)30463-X  
DOI: <https://doi.org/10.1016/j.actbio.2018.08.005>  
Reference: ACTBIO 5609

To appear in: *Acta Biomaterialia*

Received Date: 16 December 2017  
Revised Date: 20 July 2018  
Accepted Date: 6 August 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
