Supplemental Material

Accepted June 20, 2018

Drs. Simmons, Dudgeon, Whittle, and Ms. Barbosa are with the Melbourne School of Psychological Sciences, University of Melbourne, Victoria, Australia. Drs. Simmons and Whittle are also with the Melbourne Neuropsychiatry Centre, University of Melbourne and Melbourne Health. Drs. Patton and Mundy are also with the University of Melbourne, the Murdoch Children's Research Institute, and the Centre for Adolescent Health, Royal Children's Hospital, Victoria, Australia. Drs. Vijayakumar and Allen are with the University of Oregon, Eugene.

This work was supported by the Australian Research Council (ARC; DP120101402). Carolina Barbosa was supported by University of Melbourne International Research and Fee Remission Scholarships. Sarah Whittle was supported by a National Health and Medical Research Council (NHMRC) Career Development Fellowship (1125504). The funding sources had no involvement in study design; the collection, analysis, and interpretation of data; writing of the report; and the decision to submit the article for publication.

Dr. Dungeon served as the statistical expert for this research.

The authors thank the Royal Children's Hospital Melbourne, Australia, for support in acquiring the neuroimaging data, and the families who participated in the study.

Disclosure: Drs. Simmons, Vijayakumar, Dudgeon, Patton, Mundy, Allen, Whittle, and Ms. Barbosa report no biomedical financial interests or potential conflicts of interest.
