Framelet regularization for uneven intensity correction of color images with illumination and reflectance estimation

Zhenghua Huang, Likun Huang, Qian Li, Tianxu Zhang, Nong Sang

PII: S0925-2312(18)30801-4
DOI: [10.1016/j.neucom.2018.06.063](https://doi.org/10.1016/j.neucom.2018.06.063)
Reference: NEUCOM 19741

To appear in: *Neurocomputing*

Received date: 19 December 2017
Revised date: 11 May 2018
Accepted date: 28 June 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- A novel framelet-based variational scheme is proposed for image enhancement.
- The details of an image can be well preserved by the framelet regularization.
- An alternating optimization method is adopted to solve the proposed model.
- Experimental results show the effectiveness of the proposed method.
