

Accepted Manuscript

Residual force enhancement during submaximal and maximal effort contractions of the plantar flexors across knee angle

Brian H. Dalton, Vincenzo S. Contento, Geoffrey A. Power

PII: S0021-9290(18)30528-1

DOI: <https://doi.org/10.1016/j.jbiomech.2018.07.019>

Reference: BM 8782

To appear in: *Journal of Biomechanics*

Received Date: 5 December 2017

Revised Date: 6 July 2018

Accepted Date: 9 July 2018

Please cite this article as: B.H. Dalton, V.S. Contento, G.A. Power, Residual force enhancement during submaximal and maximal effort contractions of the plantar flexors across knee angle, *Journal of Biomechanics* (2018), doi: <https://doi.org/10.1016/j.jbiomech.2018.07.019>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Residual force enhancement during submaximal and maximal effort contractions of the plantar flexors across knee angle
