L-Cysteine suppresses hypoxia-ischemia injury in neonatal mice by reducing glial activation, promoting autophagic flux and mediating synaptic modification via H₂S formation

Danqing Xin, Xili Chu, Xuemei Bai, Weiwei Ma, Hongtao Yuan, Jie Qiu, Changxing Liu, Tong Li, Xin Zhou, Wenqiang Chen, Dexiang Liu, Zhen Wang

PII: S0889-1591(18)30178-8
DOI: <https://doi.org/10.1016/j.bbi.2018.05.007>
Reference: YBRBI 3396

To appear in: *Brain, Behavior, and Immunity*

Received Date: 1 February 2018
Revised Date: 23 April 2018
Accepted Date: 7 May 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

L-Cysteine suppresses hypoxia-ischemia injury in neonatal mice by reducing glial activation, promoting autophagic flux and mediating synaptic modification via H₂S formation
