Numerical investigation of the effect of microchannel evaporator design and operation on the improvement potential of ejector refrigeration cycles

Neal Lawrence, Stefan Elbel

PII: S0360-5442(18)31715-8

DOI: [10.1016/j.energy.2018.08.179](https://doi.org/10.1016/j.energy.2018.08.179)

Reference: EGY 13655

To appear in: *Energy*

Received Date: 2 May 2018

Revised Date: 7 August 2018

Accepted Date: 24 August 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Numerical Investigation of the Effect of Microchannel Evaporator Design and Operation on the Improvement Potential of Ejector Refrigeration Cycles
