

## Accepted Manuscript

On the Gravitomagnetic Origins of the Anomalous Flat Rotation Curves of Spiral Galaxies

G.G. Nyambuya

PII: S1384-1076(18)30197-0  
DOI: <https://doi.org/10.1016/j.newast.2018.08.004>  
Reference: NEASPA 1219

To appear in: *New Astronomy*

Received date: 2 July 2018  
Revised date: 11 August 2018  
Accepted date: 23 August 2018

Please cite this article as: G.G. Nyambuya, On the Gravitomagnetic Origins of the Anomalous Flat Rotation Curves of Spiral Galaxies, *New Astronomy* (2018), doi: <https://doi.org/10.1016/j.newast.2018.08.004>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Highlights**

- Nordstrom (1912)s theory is presented as an alternative to the rotation curves of spiral galaxies.
- No darkmatter is needed, but a new gravitational potential comes into play.
- The theory can — in-principle, explain the Tully-Fisher (1977) Relation.
