

## Author's Accepted Manuscript

Exosomes Derived from PEDF Modified Adipose-derived Mesenchymal Stem Cells Ameliorate Cerebral Ischemia-Reperfusion Injury by Regulation of Autophagy and Apoptosis

Xiao Huang, Jing Ding, Yufei Li, Wenjuan Liu, Jianlin Ji, Hao Wang, Xin Wang

PII: S0014-4827(18)30754-7  
DOI: <https://doi.org/10.1016/j.yexcr.2018.08.021>  
Reference: YEXCR11172

To appear in: *Experimental Cell Research*

Received date: 25 April 2018  
Revised date: 15 August 2018  
Accepted date: 18 August 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting galley proof before it is published in its final citable form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
