Phenotypic consequences of gene disruption by a balanced *de novo* translocation involving *SLC6A1* and *NAA15*

Karolina Pesz, Victor Murcia Pieńkowski, Agnieszka Pollak, Piotr Gasperowicz, Maciej Sykulski, Joanna Kosińska, Magdalena Kiszko, Bogusława Krzykwa, Magdalena Bartnik-Głaska, Beata Nowakowska, Małgorzata Rydzanicz, Maria Małgorzata Sasiadek, Rafał Płoski

PII: S1769-7212(18)30097-1

DOI: [10.1016/j.ejmg.2018.03.013](https://doi.org/10.1016/j.ejmg.2018.03.013)

Reference: EJMG 3441

To appear in: *European Journal of Medical Genetics*

Received Date: 5 February 2018

Revised Date: 26 March 2018

Accepted Date: 29 March 2018

Please cite this article as: K. Pesz, V.M. Pieńkowski, A. Pollak, P. Gasperowicz, M. Sykulski, J. Kosińska, M. Kiszko, Bogusł. Krzykwa, M. Bartnik-Głaska, B. Nowakowska, Mał. Rydzanicz, Maria. Mał. Sasiadek, Rafał. Płoski, Phenotypic consequences of gene disruption by a balanced *de novo* translocation involving *SLC6A1* and *NAA15*, *European Journal of Medical Genetics* (2018), doi: 10.1016/j.ejmg.2018.03.013.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Phenotypic consequences of gene disruption by a balanced de novo translocation involving *SLC6A1* and *NAA15***
