This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**HIGHLIGHTS**

- Cardiomyopathy causes significant morbidity and mortality in DMD
- Cardiologists should be part of the DMD care team from diagnosis
- Cardiac MRI detects cardiac fibrosis at young ages in DMD
- Preventive cardiac therapy should be started early in DMD patients
- DMD carrier females are at risk for cardiomyopathy
