This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Part 2: Is the maxillary canting and its surgical correction in patients with CFM correlated to the mandibular deformity?

Britt I. Pluijmers, MD, DMD ^{a*}; Lara S. van de Lande BSc^{a,b*}; Cornelia J.J.M.

Caron, MD, DMD ^a; Eppo B. Wolvius, DDS, MD, PhD ^a; David J. Dunaway, CBE, FDSRCS, FRCS(plast)^c; Bonnie Padwa DMD, MD^b; Maarten J. Koudstaal, MD, DMD, PhD ^{a,b,c}

a The Dutch Craniofacial Centre, Department of Oral and Maxillofacial Surgery, Erasmus University Medical Center, Sophia's Children's Hospital, Rotterdam, The Netherlands

b The Craniofacial Centre, Boston Children's Hospital, Boston, United States of America

c Craniofacial Unit, Great Ormond Street Hospital, London, United Kingdom

***** Both authors contributed equally to this paper.

Head of Department: Professor Eppo B. Wolvius, DDS MD PhD
