

## Accepted Manuscript

Title: Mifepristone reduces hypothalamo-pituitary-adrenal axis activation and restores weight loss in rats subjected to dietary restriction and methylphenidate administration

Authors: Rami Bou Khalil, Viviane Smayra, Youakim Saliba, Joelle Hajal, Jules-Joël Bakhos, Lama Souaiby, Sami Richa, Jean Tamraz, Nassim Farès

PII: S0168-0102(17)30639-9  
DOI: <https://doi.org/10.1016/j.neures.2017.12.008>  
Reference: NSR 4140

To appear in: *Neuroscience Research*

Received date: 23-10-2017  
Revised date: 16-12-2017  
Accepted date: 22-12-2017

Please cite this article as: Khalil, Rami Bou, Smayra, Viviane, Saliba, Youakim, Hajal, Joelle, Bakhos, Jules-Joël, Souaiby, Lama, Richa, Sami, Tamraz, Jean, Farès, Nassim, Mifepristone reduces hypothalamo-pituitary-adrenal axis activation and restores weight loss in rats subjected to dietary restriction and methylphenidate administration. *Neuroscience Research* <https://doi.org/10.1016/j.neures.2017.12.008>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
