

Accepted Manuscript

The impact of particle shape on fall velocity: Implications for volcanic ash dispersion modelling

Jennifer Saxby, Frances Beckett, Katharine Cashman, Alison Rust, Eleanor Tennant

PII: S0377-0273(18)30177-X
DOI: doi:[10.1016/j.jvolgeores.2018.08.006](https://doi.org/10.1016/j.jvolgeores.2018.08.006)
Reference: VOLGEO 6428

To appear in: *Journal of Volcanology and Geothermal Research*

Received date: 23 April 2018
Revised date: 16 August 2018
Accepted date: 20 August 2018

Volgeo (2018), doi:[10.1016/j.jvolgeores.2018.08.006](https://doi.org/10.1016/j.jvolgeores.2018.08.006)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Title

The impact of particle shape on fall velocity: implications for volcanic ash dispersion modelling

Acknowledgements

This work was supported by the Natural Environment Research Council and the Met Office, UK, as well as the AXA Research Fund and a Royal Society Wolfson Merit Award (to K. Cashman). We would like to acknowledge Helen Webster for her insights into the turbulence parameterisation in NAME, and Tom Davies (University of Bristol) for his help with obtaining and processing tomography data. We also acknowledge Dave Thomson, Claire Witham, Andrew Jones, and the Atmospheric Dispersion and Air Quality research group (Met Office, UK) for their support with dispersion modelling. Thanks are due to Fabio Dioguardi and one anonymous reviewer for providing detailed and constructive reviews, and to Matt Hort for providing feedback on an earlier draft.

Colour Figures

Colour should be used for all figures in print apart from Figure 11, which does not use colour.
