This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

# Sericin-Based Wound Dressing with Wound Moisture Indicator: In Vitro and In Vivo Comparison Study

Meng-Yi Bai<sup>1, 2\*</sup>, Ding-Teng Wang<sup>1</sup>, Joey Sin<sup>1</sup>

<sup>1</sup>Graduate Institute of Biomedical Engineering, National Taiwan University of Science and Technology, Taipei 10607, Taiwan, Republic of China (ROC)

<sup>2</sup> Adjunct appointment to the Department of Biomedical Engineering National Defense Medical Center, Taipei 11490, Taiwan, Republic of China (ROC)

**\*Corresponding author:** Ph.D. Meng-Yi Bai, Graduate Institute of Biomedical Engineering, National Taiwan University of Science and Technology, Taipei 10607, Taiwan, Republic of China (ROC)

Phone: +886-2-27303743, Fax: +886-2-27303733,

E-mail: [mybai@mail.ntust.edu.tw](mailto:mybai@mail.ntust.edu.tw)

**Financial support and Author Contributions:** M.Y. Bai would like to thank the Ministry of Science and Technology (MOST) for financial support under contract no. (MOST 107-2221-E-011-046-) and partly funded by (MOST 106-2221-E-011-032-) and Global Taiwan Center for Excellence for Thin-Film Metallic Glass at National Taiwan University of Science and Technology. M.Y. Bai authored the manuscript and prepared all figures. M.Y. Bai and J. Sin designed and performed all experimental procedures, including setup of the electrospinning system, preparation of the materials, cell studies and animal studies. D.T. Wang was responsible for the preparation of wound moisture indicator, detection of its fluorescent property and all in vivo animal studies.
