## Subject Index

- Abdominal injury, blunt, in children  
  diagnosis of  
    computed tomography in, 25–26  
    focused abdominal sonography for trauma (FAST)  
      in, 26  
    laboratory evaluation in, 24–25  
    laparoscopy in, 26  
    peritoneal lavage in, 26  
    ultrasound in, 26  
  epidemiology of, 23  
  hepatic injuries after, 27–28  
  initial management of, 23–24
- Abdominal injury, blunt, in children (*continued*)  
  intestinal injuries after, 28–29  
  pancreatic injuries after, 29  
  splenic injuries after, 27  
Abdominal neoplasms, in childhood  
  neuroblastoma, 189–190  
  Wilms tumor, 188–189  
Absorption prevention  
  for calcium channel blocker overdose, 111  
  of toxic substances in the gastrointestinal tract,  
    activated charcoal for, 76–78

- N-Acetyltransferase, in drug metabolism and interactions, 97
- Activated charcoal, for absorption prevention, and elimination enhancement, of toxic substances, in the gastrointestinal tract, 76–78
- Acute airway management, in pediatric laryngotracheal injury, 44–46
- Acute anemia  
   case presentations and discussions of, 128–136  
   classification of, 125–126  
   definition of, 124–125  
   diagnostic evaluation of, 125–126  
   important historical factors in patient evaluation, 126–127  
   laboratory evaluation for, 127–129  
   physical findings in, 127, 136
- Acute coronary syndrome, causing chest pain in grandparent, 222–223
- Acute lymphocytic leukemia, in childhood  
   case studies of, 184–186  
   discussion of, 186–188
- Adenosine, PALS update for emergency physicians, 211
- Adolescents, and children, pulmonary embolism in  
   clinical presentation of, 246–247  
   diagnosis of  
     arterial blood gas, 247  
     chest radiography, 246  
     computed tomography, 248–249  
     D-dimer assays, 247  
     electrocardiogram, 247  
     ventilation-perfusion ratio (V/Q) scan, 247–248  
   epidemiology of, 244–245  
   prevention of, 250  
   risk factors of  
     central venous catheters, 245  
     genetic thrombophilias, 245–246  
   treatment of  
     heparin, 249  
     low-molecular weight heparin, 249  
     thrombolytic agents, 249–250
- Airway management, acute, in pediatric laryngotracheal injury, 44–46
- All-terrain vehicle (ATV)  
   history and associated injuries, 57–58  
   injury prevention, 59–60  
   pediatric injury from, 58–59  
   and risk of injury, 59
- Allograft rejection, cardiac, in congenital heart disease, 220
- Amiodarone, PALS update for emergency physicians, 211–212
- Amphetamines, hallucinogenic, as emerging drugs of abuse, 83
- Anemia, acute  
   case presentations and discussions of, 128–136  
   classification of, 125–126
- Anemia, acute (*continued*)  
   definition of, 124–125  
   diagnostic evaluation of, 125–126  
   important historical factors in patient evaluation, 126–127  
   laboratory evaluation for, 127–129  
   physical findings in, 127, 136
- Angina, unstable, causing chest pain in grandparent, 223–224
- Anomalous origin of the left coronary artery from the pulmonary artery (ALCAPA), undiagnosed in infants, 202–203
- Antiplatelet therapy, for emergency management of chest pain in grandparent, 227–228
- Aortic dissection, causing chest pain in grandparent, 225
- Aortic insufficiency, in children, 235
- Arrhythmias, undiagnosed in infants  
   long QT syndrome (LQTS), 204–205  
   supraventricular tachycardia, 204
- Arrhythmogenic right ventricular dysplasia, causing sudden death in young athletes, 195–196
- Arterial blood gas, for diagnosis of pulmonary embolism in children and adolescents, 247
- Asphyxia, traumatic, caused by life-threatening chest injuries in children, 19
- Asplenia, with sepsis, in immunosuppressed host  
   background of, 180  
   case study of, 179–180  
   clinical presentation and epidemiology of, 180–181  
   diagnosis and management of, 181
- Athletes, young, sudden cardiac death in  
   causes of  
     anomalous origin of coronary arteries, 196  
     arrhythmogenic right ventricular dysplasia, 195–196  
     commotio cordis, 196–197  
     hypertrophic cardiomyopathy, 195  
     Marfan syndrome, 196  
     myocarditis, 196  
   emergency department evaluation of, 198  
   screening of, 197–198
- Athlete's heart, differentiation from hypertrophic cardiomyopathy, 197
- Atrial ectopic tachycardia, case report of congestive heart failure from exacerbation of, 263–265
- Atrial septal defect, in children, 235
- ATV. *See* All-terrain vehicle
- Automatic external defibrillators (AEDS), PALS update for emergency physicians, 212
- Bacterial infection, as complication of sickle cell disease  
   case discussion of, 142–143  
   case study of, 139–140
- Bad news, delivery of, in emergency department, 165–171  
   rapport and trust in, 167–168  
   reflective listening in, 169
