

Index

Note: Page numbers of article titles are in **boldface** type.

A

- Amastia, 74, 75
- Amazia, 74
- Apoptosis, cranial suture biology and, 126
- Arteriovenous malformations, clinical staging of, 113
management of, 113–114
pathogenesis of, 112, 113
- Athelia, 74, 76

B

- Bionics, in treatment of brachial plexus lesions, 94
- Blood vessels, malformations of, and hemangiomas,
current management of, **99–116**
history and physical examination in, 99–100
- BMP antagonists, in cranial suture biology, 125–126
- Bone replacement, current techniques for, 123
- Bone tissue engineering, 128–131
cellular therapies and, 130–131
for complex structures, 131
in facial trauma, 128
scaffolds for, 129–130
tissue regeneration in, 128–129
- Botulinum injection, in obstetric brachial plexus
palsy, 92
- Brachial plexus, avulsed roots of, re-implantation of,
in treatment of brachial plexus lesions, 93
injury(ies) of, electrophysiologic assessment of, 83
in infant, management of, **79–98**
mechanism of, 80–81
primary surgery in, 85–88
strategies for, 88
lesions of, nerve transfers in, 90–91
physical therapy in, 91–92
tendon transfers in, 90

- treatment of, bionics in, 93–94
future directions in, 93–94
re-implantation of avulsed roots in, 93
stem cells in, 94
- repair of, primary, rationale for, 83–85
secondary deformities of, correction of, 88–90
- Brachial plexus palsy, obstetric, botulinum injection
in, 92
epidemiology of, 79–80
initial assessment in, 81–83
reconstruction in, outcomes of, 92–93
treatment of, algorithm for, 84
- Breast, abnormalities of, accessory nipples, 66
deformational, 69–71
hyperplastic, 66–69
hypoplastic, 71–76
iatrogenic, 69
pediatric, 66
anterior thoracic hypoplasia of, 74
bilateral absence of, 75
burns of, 70–71, 74
development of, 65
giant fibroadenoma(s) of, 68, 69
growth of, aesthetic considerations in, 65–66
hemangioma of, 70, 72
hyperplasia of, pediatric, 68
hypoplasia of, following thoracostomy tube
placement, 69, 71
juvenile hypertrophy of, 68–69, 70
problems of, pediatric, treatment of, **65–78**
traumatic anomalies of, 70–71, 73
tuberous deformity of, 72–73, 75
tumor excision from, 70

C

- Capillary-lymphaticovenous malformation, 114
- Cellular therapies, and bone tissue engineering,
130–131
- Child(ren), problems of breast in. See under *Breast*.

- Cleft lip, and cleft palate, treatment of, international trends in, **11–15**
 preoperative orthopedic appliances and, 11
 survey of, 11, 12
 lip adhesion in, 12
 bilateral, management of, 12, 13
 unilateral, management of, 12
- Cleft nose, management of, 12, 13
- Cleft palate. See also *Cleft lip, and cleft palate*.
 management of, 13
- Congenital defects, free tissue transfer in, 47
- Corticosteroids, in hemangioma, 104–105
- Cranial suture biology, BMP antagonists in, 125–126
 development of, 124
 genetics and, 124–125
 studies in, 123
- Cranial sutures, embryonic origins of, 124
- Craniosynostosis, genetic basis of, 124–125
 lambdoid, 55–56
 and deformational plagiocephaly, compared, 57, 58
- Cranium, asymmetry of, head molding in, 53

D

- Digits, pediatric, replantation of, 2–3
 general concepts of, 2
- Distraction osteogenesis, 126–128
 biology of, 123
 mechanobiology of, 127–128
 molecular biology of, 127

E

- Erb's palsy, 81
- Exercise(s), neck, in deformational plagiocephaly, 60
- Extremity(ies). See also *Lower extremity(ies)*;
 Upper extremity(ies).
 congenital giant nevus of, tissue expansion in, 39–40, 41
 congenital melanocytic nevi of, treatment of, 17
 of pediatric patient, tissue expansion in, 39–40

F

- Face, congenital melanocytic nevi of, treatment of, 16
 trauma to, bone tissue engineering in, 128
- Fibroadenoma(s), giant of breast, 68, 69

- Forearm, pediatric, replantation of, 3–4
 general concepts of, 2
- Free tissue transfer, in children, congenital defects requiring, 47
 defects requiring, etiologies of, 45
 donor site selection for, 48–51
 growth issues and, 51
 in microtia patients, 47
 in Romberg's hemifacial atrophy, 47, 48
 in tumors, 47–48, 49
 technical considerations for, 51
 trauma as reason for, 45–47

G

- Granuloma, pyogenic, 106
- Gynecomastia, 67–68

H

- Hand, pediatric, deformities of, reconstruction of, 1
 replantation of, 3
 general concepts of, 2
- Head and neck, congenital giant nevus of, tissue expansion in, 38–39, 40
 of pediatric patient, tissue expansion in, 38–39
- Head molding, in asymmetry of cranium, 53
- Helmet therapy, in deformational plagiocephaly, 62–63
- Hemangioendothelioma, kaposiform, 106–107
- Hemangioma(s), and vascular malformations, current management of, **99–116**
 history and physical examination in, 99–100
 clinical evaluation of, 102–104
 clinical features of, 100–102
 differential diagnosis of, 102
 lumbosacral disease and, 104
 multiple cutaneous, 104
 of breast, 70, 72
 pathogenesis of, 100
 treatment of, 104–106

K

- Kaposiform hemangioendothelioma, 106–107
- Kasabach-Merritt phenomenon, 106–107
- Klumpke's palsy, 82
