This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

The Taphonomy of Human Remains in a Glacial Environment

Acknowledgments

Most importantly, we want to acknowledge the men involved in this incident and the sacrifice they and their families made for their country. Many people at the DPAA-CIL were part of this work, as recovery efforts and analysis of this scale required the expertise of many of our current and former colleagues. Greg Berg, Kelly Esh, MariaTeresa Tersigni-Tarant, Nicholas V. Passalacqua, Alec Christensen, Sean Tallman, Robert Mann, Thomas Sprague, Sabrina Ta'ala, Matt Rhode, Denise To, Owen O'Leary, and Andy Heuer assisted in some way with this project. Gary Haynes gave valuable comments on an earlier draft of this manuscript. Thank you to the Central Identification Laboratory at the Defense POW/MIA Accounting Agency for granting permission to publish this work. We also thank the anonymous reviewers for improving this manuscript.
