Singh, A review of sex estimation techniques during examination of skeletal remains in forensic anthropology casework, *Forensic Science International* (2016), <http://dx.doi.org/10.1016/j.forsciint.2016.02.007>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Acknowledgements

This review article on methodological issues has been the outcome of the authors' experiences (KK and TK) in the field of sex estimation and forensic anthropology of over a decade. It is hoped that the results of these experiences would be fruitful to future researchers. The corresponding author wishes to acknowledge Department of Anthropology (UGC Centre for Advanced Studies in Anthropology, DST PURSE Grant), Panjab University, Chandigarh, India for providing platform for writing such exhaustive work in forensic anthropology.
