Microstructure and geochemical signatures of metasedimentary origin pseudotachylyte: Implications for fluid activity during paleoseismicity

Yoshihiro Nakamura, Tsuyoshi Toyoshima, Madhusoodhan Satish-Kumar

PII: S0040-1951(18)30253-1
DOI: doi:[10.1016/j.tecto.2018.07.010](https://doi.org/10.1016/j.tecto.2018.07.010)
Reference: TECTO 127886
To appear in: *Tectonophysics*
Received date: 25 June 2017
Revised date: 14 June 2018
Accepted date: 10 July 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Microstructure of metasedimentary origin pseudotachylytes #R3

**Microstructure and geochemical signatures of
metasedimentary origin pseudotachylyte:
Implications for fluid activity during
paleoseismicity**
