

Subject Index

Methods and constructs

Theoretical

Computational methods for electronic structure

- A priori evaluation of the solvent contribution to the reorganization energy accompanying intramolecular electron transfer:
Predicting the nature of the Creutz–Taube ion, J.R. Reimers, Z.-L. Cai and N.S. Hush 319 (2005) 39

-density functional theory

- Molecular transport calculations with Wannier functions, K.S. Thygesen and K.W. Jacobsen 319 (2005) 111
Electronic structure of S–C₆H₅ self-assembled monolayers on Cu(111) and Au(111) substrates, V. Perebeinos and M. Newton 319 (2005) 159
Electrolysis of water on (oxidized) metal surfaces, J. Rossmeisl, A. Logadottir and J.K. Nørskov 319 (2005) 178
Self-inhibition phenomena in the electroreduction of hexamolybdocobaltate(III): A combined experimental and computational study, M.I. Borzenko, R.R. Nazmutdinov, D.V. Glukhov, G.A. Tsirlina and M. Probst 319 (2005) 200

Semiempirical methods

- Energy gap law for electron transfer rates in polymer glasses, M. Tachiya and A.V. Barzykin 319 (2005) 222
A unified picture of energy and electron transfer in primary photosynthesis, L.M.C. Barter and D.R. Klug 319 (2005) 308

Molecular response to external fields (incl. optical susceptibilities, dichroism, hyperpolarizabilities)

- Electron transfer through time dependent bridges: Differences between Franck–Condon and Born–Oppenheimer breakdown, A. Teklos and S.S. Skourtis 319 (2005) 52
Time-resolved measurements of the external electric field effects on fluorescence in electron donor and acceptor pairs of *N*-ethylcarbazole and dimethyl terephthalate doped in a polymer film, T. Iimori, T. Yoshizawa, T. Nakabayashi and N. Ohta 319 (2005) 101

Scattering of waves and particles

- Tunneling and resonant conductance in one-dimensional molecular structures, M.A. Kozhushner, V.S. Posvyanskii and I.I. Oleynik 319 (2005) 368

Reactive molecular dynamics including dissipative processes

- Comparison of dynamical aspects of nonadiabatic electron, proton, and proton-coupled electron transfer reactions, E. Hatcher, A. Soudackov and S. Hammes-Schiffer 319 (2005) 93
The role of water in the initial steps of methanol oxidation on Pt(111), C. Hartnig and E. Spohr 319 (2005) 185

Intramolecular dynamics

- Electron transfer through time dependent bridges: Differences between Franck–Condon and Born–Oppenheimer breakdown, A. Teklos and S.S. Skourtis 319 (2005) 52
Incoherent charge hopping and conduction in DNA and long molecular chains, M. Bixon and J. Jortner 319 (2005) 273

Molecular dynamics of many particle systems and condensed phases

- Molecular simulations of outersphere reorganization energies for intramolecular electron and hole transfer in polar solvents, I.V. Leontyev, A.V. Tovmash, M.V. Vener, I.V. Rostov and M.V. Basilevsky 319 (2005) 4
The role of water in the initial steps of methanol oxidation on Pt(111), C. Hartnig and E. Spohr 319 (2005) 185

Migration and interaction on grids and lattices

- Counterion diffusivity measurements support ion atmosphere relaxation control of electron transfer rates in a semi-solid ruthenium complex molten salt, W. Wang, D. Lee, A.M. Leone and R.W. Murray 319 (2005) 126
Kinetic theory for electron transmission through a molecular wire, E.G. Petrov, V. May and P. Hänggi 319 (2005) 380

Statistical computational methods (incl. Monte Carlo)

- Direct correlation functions and the density functional theory of polar solvents, R. Ramirez, M. Mareschal and D. Borgis 319 (2005) 261

Dynamics of structures, lattices and macromolecular conformations

- Modeling temperature dependent kinetic isotope effects for hydrogen transfer in a series of soybean lipoxygenase mutants:
The effect of anharmonicity upon transfer distance, M.P. Meyer and J.P. Klinman 319 (2005) 283
- Synergetic mechanisms of structural regulation of the electron transfer and other reactions of biological macromolecules,
L.N. Christophorov and V.N. Kharkyanen 319 (2005) 330

Fluctuations and random processes

- Microscopic model of charge carrier transfer in complex media, O. Bénichou, J. Klafter, M. Moreau and G. Oshanin 319 (2005) 16
- ITIES fluctuations induced by easily transferable ions, L.I. Daikhin, A.A. Kornyshev, A.M. Kuznetsov and M. Urbakh 319 (2005) 253
- Channel-facilitated membrane transport: Constructive role of particle attraction to the channel pore, A.M. Berezhkovskii
and S.M. Bezrukov 319 (2005) 342

Non-equilibrium statistical mechanics

- Microscopic model of charge carrier transfer in complex media, O. Bénichou, J. Klafter, M. Moreau and G. Oshanin 319 (2005) 16
- ITIES fluctuations induced by easily transferable ions, L.I. Daikhin, A.A. Kornyshev, A.M. Kuznetsov and M. Urbakh 319 (2005) 253
- Charge transport through image charged stabilized states in a single molecule single electron transistor device, P. Hedegård
and T. Bjørnholm 319 (2005) 350

Equilibrium statistical mechanics and thermodynamics

- Direct correlation functions and the density functional theory of polar solvents, R. Ramirez, M. Mareschal and D. Borgis 319 (2005) 261
- Continuum electrostatics of proteins: Experimental test with model solvents and the method of the proteins pK calculations,
L.I. Krishtalik 319 (2005) 316

Extremum methods for ensembles (energy, entropy, free energy)

- Direct correlation functions and the density functional theory of polar solvents, R. Ramirez, M. Mareschal and D. Borgis 319 (2005) 261

Time and space correlation functions

- Comparison of dynamical aspects of nonadiabatic electron, proton, and proton-coupled electron transfer reactions, E.
Hatcher, A. Soudackov and S. Hammes-Schiffer 319 (2005) 93
- ITIES fluctuations induced by easily transferable ions, L.I. Daikhin, A.A. Kornyshev, A.M. Kuznetsov and M. Urbakh 319 (2005) 253
- Channel-facilitated membrane transport: Constructive role of particle attraction to the channel pore, A.M. Berezhkovskii
and S.M. Bezrukov 319 (2005) 342

Experiment*Magnetic resonances*

- Dynamic NMR studies of base-catalyzed intramolecular single vs. intermolecular double proton transfer of 1,3-bis(4-
fluorophenyl)triazene, H.-H. Limbach, F. Männle, C. Detering and G.S. Denisov 319 (2005) 69

*Molecular spectroscopy**-Raman*

- Contrasting electroabsorbance behavior of two borderline class II/class III mixed-valence systems, P.H. Dinolfo, R.D.
Williams and J.T. Hupp 319 (2005) 28

-visible

- Contrasting electroabsorbance behavior of two borderline class II/class III mixed-valence systems, P.H. Dinolfo, R.D.
Williams and J.T. Hupp 319 (2005) 28
- Organization of supramolecular assemblies of fullerene, porphyrin and fluorescein dye derivatives on TiO₂ nanoparticles for
light energy conversion, T. Hasobe, S. Hattori, P.V. Kamat, Y. Urano, N. Umezawa, T. Nagano and S. Fukuzumi 319 (2005) 243

Photoelectron and Auger spectroscopy

- Electrocatalytic activation of Ni for H₂ evolution by spontaneous deposition of Ru, I. Bianchi, E. Guerrini and S. Trasatti 319 (2005) 192

Ultrafast measurements

- Photoinduced electron transfer in a donor–acceptor dyad oriented by an aligned nematic liquid crystal solvent, L. Sinks,
M.J. Fuller, W. Liu, M.J. Ahrens and M.R. Wasielewski 319 (2005) 226
- Primary charge separation between P* and B_A: Electron-transfer pathways in native and mutant GM203L bacterial reaction
centers, A.G. Yakovlev, M.R. Jones, J.A. Potter, P.K. Fyfe, L.G. Vasilieva, A.Y. Shkuropatov and V.A. Shuvalov 319 (2005) 297
- Size dependence investigations of hot electron cooling dynamics in metal/adsorbates nanoparticles, C. Bauer, J.-P. Abid and
H.H. Girault 319 (2005) 409

Scanning tunneling and force microscopies

- Molecular assemblies and redox reactions of zinc(II) tetraphenylporphyrin and zinc(II) phthalocyanine on Au(1 1 1) single
crystal surface at electrochemical interface, S. Yoshimoto, E. Tsutsumi, K. Suto, Y. Honda and K. Itaya 319 (2005) 147
- Electrical resistivity of monolayers and bilayers of alkanethiols in tunnel junction with gate electrode, R.L. York, D.
Nacionales and K. Slowinski 319 (2005) 235

Measurement of macroscopic variables

- Continuum electrostatics of proteins: Experimental test with model solvents and the method of the proteins pK calculations,
L.I. Krishtalik 319 (2005) 316
