

Subject Index of Volume 78

- Aggregate state**
Photochemical activities of plant photosystem I particles reconstituted into phosphatidylglycerol liposomes, 125
- Aminolevulinic acid**
A comprehensive overview of photodynamic therapy in the treatment of superficial fungal infections of the skin, 1
- Amphiphilicity chlorins**
Influence of substitutions on asymmetric dihydroxychlorins with regard to intracellular uptake, subcellular localization and photosensitization of Jurkat cells, 17
- Anthraquinones**
Natural anthraquinones probed as Type I and Type II photosensitizers: singlet oxygen and superoxide anion production, 77
- 1,4-Anthraquinones**
Role of LHCII organization in the interaction of substituted 1,4-anthraquinones with thylakoid membranes, 115
- Apoptosis**
Influence of substitutions on asymmetric dihydroxychlorins with regard to intracellular uptake, subcellular localization and photosensitization of Jurkat cells, 17
Phototoxicity, distribution and kinetics of association of UVA-activated chlorpromazine, 8-methoxypsoralen, and 4,6,4'-trimethylangelicin in Jurkat cells, 155
- ATX-S10Na(II)**
The vascular response to photodynamic therapy with ATX-S10Na(II) in the normal rat colon, 69
- BALB/c mice tumour model**
Improved pharmacokinetics, biodistribution and necrosis in vivo using a new near infra-red photosensitizer: tetrahydroporphyrin tetratosylat, 203
- Benzoyl peroxide**
Balsamodendron mukul suppresses benzoyl peroxide and ultraviolet light induced tumor promotional events in Swiss mice, 43
- Biophoton**
Year-long biophoton measurements: normalized frequency count analysis and seasonal dependency, 149
- Biophotons**
Further analysis of delayed luminescence of plants, 235
- B. mukul***
Balsamodendron mukul suppresses benzoyl peroxide and ultraviolet light induced tumor promotional events in Swiss mice, 43
- Buffer effect**
Effect of phosphate buffer on photodegradation reactions of riboflavin in aqueous solution, 229
- C57BL/6N mouse**
Combined dermal exposure to permethrin and *cis*-urocanic acid suppresses the contact hypersensitivity response in C57BL/6N mice in an additive manner, 29
- Calibration**
Theoretical analysis on ratiometric fluorescent indicators caused biased estimates of intracellular free calcium concentrations, 179
- Calorimetric enthalpy**
Kinetic nature of the thermal destabilization of LHCII macroaggregates, 165
- Cancer progression**
Solar radiation, vitamin D and survival rate of colon cancer in Norway, 189
- Carotenoid isomers**
Temperature-induced isomerization of violaxanthin in organic solvents and in light-harvesting complex II, 109
- Carotenoids**
Functional in situ evaluation of photosynthesis-protecting carotenoids in mutants of the cyanobacterium *Synechocystis* PCC6803, 195
Temperature-induced isomerization of violaxanthin in organic solvents and in light-harvesting complex II, 109
- Cell membrane**
Evidence for the hydration effect at the semiconductor phospholipid-bilayer interface by TiO₂ photocatalysis, 253
- Cell-mediated immunity**
Combined dermal exposure to permethrin and *cis*-urocanic acid suppresses the contact hypersensitivity response in C57BL/6N mice in an additive manner, 29
- Cellular uptake**
Cellular uptake and photocytotoxicity of glycoconjugated chlorins in HeLa cells, 7
- Chemoprevention**
Balsamodendron mukul suppresses benzoyl peroxide and ultraviolet light induced tumor promotional events in Swiss mice, 43
- Chlorophyll fluorescence**
Role of LHCII organization in the interaction of substituted 1,4-anthraquinones with thylakoid membranes, 115
- Chlorpromazine**
Phototoxicity, distribution and kinetics of association of UVA-activated chlorpromazine, 8-methoxypsoralen, and 4,6,4'-trimethylangelicin in Jurkat cells, 155
- Choroidal melanoma cell**
Improved pharmacokinetics, biodistribution and necrosis in vivo using a new near infra-red photosensitizer: tetrahydroporphyrin tetratosylat, 203
- cis*-Urocanic acid**
Combined dermal exposure to permethrin and *cis*-urocanic acid suppresses the contact hypersensitivity response in C57BL/6N mice in an additive manner, 29
- Coherent states**
Further analysis of delayed luminescence of plants, 235

- Colon cancer
 - Solar radiation, vitamin D and survival rate of colon cancer in Norway, 189
- Colon-38 tumor
 - Effects of photodynamic therapy using a fractionated dosing of mono-L-aspartyl chlorin e6 in a murine tumor, 135
- Contact hypersensitivity
 - Combined dermal exposure to permethrin and *cis*-urocanic acid suppresses the contact hypersensitivity response in C57BL/6N mice in an additive manner, 29
- Copigmentation
 - The copigmentation effect of sinapic acid on malvin: a spectroscopic investigation on colour enhancement, 223
- CT state
 - Ultrafast relaxation dynamics of a biologically relevant probe dansyl at the micellar surface, 93
- CTAB micelle
 - Ultrafast relaxation dynamics of a biologically relevant probe dansyl at the micellar surface, 93
- Cyclobutane pyrimidine dimers
 - 1,25-Dihydroxyvitamin D₃ and analogues protect primary human keratinocytes against UVB-induced DNA damage, 141
- Cyclodextrin
 - Encapsulation of norharmane in cyclodextrin: formation of 1:1 and 1:2 inclusion complexes, 215
- Dansyl
 - Ultrafast relaxation dynamics of a biologically relevant probe dansyl at the micellar surface, 93
- Decay-associated spectra
 - Time-resolved fluorescence of the bacteriophage T4 capsid protein gp23, 53
- Delayed Luminescence
 - Further analysis of delayed luminescence of plants, 235
- Denaturation transition
 - Kinetic nature of the thermal destabilization of LHCII macro-aggregates, 165
- Differential scanning calorimetry
 - Kinetic nature of the thermal destabilization of LHCII macro-aggregates, 165
- 1,25-Dihydroxyvitamin D₃
 - 1,25-Dihydroxyvitamin D₃ and analogues protect primary human keratinocytes against UVB-induced DNA damage, 141
- DNA damage
 - 1,25-Dihydroxyvitamin D₃ and analogues protect primary human keratinocytes against UVB-induced DNA damage, 141
- Dye extrusion
 - Theoretical analysis on ratiometric fluorescent indicators caused biased estimates of intracellular free calcium concentrations, 179
- Electron-spray ionization time-of-flight mass spectrometry
 - Cellular uptake and photocytotoxicity of glycoconjugated chlorins in HeLa cells, 7
- Extracorporeal phototherapy
 - Phototoxicity, distribution and kinetics of association of UVA-activated chlorpromazine, 8-methoxypsoralen, and 4,6,4'-trimethylangelicin in Jurkat cells, 155
- Fast-gated CCD
 - Time-resolved fluorescence of the bacteriophage T4 capsid protein gp23, 53
- Fluorescence
 - Encapsulation of norharmane in cyclodextrin: formation of 1:1 and 1:2 inclusion complexes, 215
- Fluorescence emission
 - Kinetic nature of the thermal destabilization of LHCII macro-aggregates, 165
- Fluorescence lifetimes
 - Time-resolved fluorescence of the bacteriophage T4 capsid protein gp23, 53
- Fluorescence quenching
 - Time-resolved fluorescence of the bacteriophage T4 capsid protein gp23, 53
- Fluorescent probes
 - Flow-cytometric monitoring of mitochondrial depolarisation: from fluorescence intensities to millivolts, 99
- Fractionated dosing
 - Effects of photodynamic therapy using a fractionated dosing of mono-L-aspartyl chlorin e6 in a murine tumor, 135
- Frequency counts
 - Year-long biophoton measurements: normalized frequency count analysis and seasonal dependency, 149
- Glycoconjugated chlorins
 - Cellular uptake and photocytotoxicity of glycoconjugated chlorins in HeLa cells, 7
- Global analysis
 - Time-resolved fluorescence of the bacteriophage T4 capsid protein gp23, 53
- gp23
 - Time-resolved fluorescence of the bacteriophage T4 capsid protein gp23, 53
- Histology
 - Effect of low-level laser therapy on the healing of second-degree burns in rats: a histological and microbiological study, 171
- Heterophyllaea pustulata*
 - Natural anthraquinones probed as Type I and Type II photosensitizers: singlet oxygen and superoxide anion production, 77
- 5-Hydroxytryptophan
 - Identification and reactivity of the triplet excited state of 5-hydroxytryptophan, 245
- Hyperbolic oscillations
 - Further analysis of delayed luminescence of plants, 235
- Inclusion complex
 - Encapsulation of norharmane in cyclodextrin: formation of 1:1 and 1:2 inclusion complexes, 215
- Intracellular free calcium
 - Theoretical analysis on ratiometric fluorescent indicators caused biased estimates of intracellular free calcium concentrations, 179
- Keratinocytes
 - 1,25-Dihydroxyvitamin D₃ and analogues protect primary human keratinocytes against UVB-induced DNA damage, 141
- Kinetics
 - Effect of phosphate buffer on photodegradation reactions of riboflavin in aqueous solution, 229
- Laser
 - Effect of low-level laser therapy on the healing of second-degree burns in rats: a histological and microbiological study, 171
- Laser flash photolysis
 - Identification and reactivity of the triplet excited state of 5-hydroxytryptophan, 245
- LHCII
 - Temperature-induced isomerization of violaxanthin in organic solvents and in light-harvesting complex II, 109
