

## Subject index

### Aluminum, Aluminum Alloys and Compounds

- Thermal conductivity degradation of ceramic materials due to low temperature, low dose neutron irradiation, L.L. Snead, S.J. Zinkle and D.P. White 340 (2005) 187

### Amorphization and Amorphous Materials

- Corrosion of alkali–borosilicate waste glass K-26 in non-saturated conditions, M.I. Ojovan, R.J. Hand, N.V. Ojovan and W.E. Lee 340 (2005) 12
- Elemental dissolution study of Pu-bearing borosilicate glasses, D.M. Wellman, J.P. Icenhower and W.J. Weber 340 (2005) 149
- Environment and oxidation state of molybdenum in simulated high level nuclear waste glass compositions, R.J. Short, R.J. Hand, N.C. Hyatt and G. Möbus 340 (2005) 179
- Analysis of molecular oxygen formation in irradiated glasses: a Raman depth profile study, N. Ollier, B. Boizot, B. Reynard, D. Ghaleb and G. Petite 340 (2005) 209

### Analytical Instruments and Methods (*not listed elsewhere*)

- Influence on the structural characteristic of defect solid solution  $\text{Gd}_x\text{Zr}_{1-x}\text{O}_{2-x/2}$  with  $0.18 \leq x \leq 0.62$ , J. Wang, M. Takeda and A. Nakamura 340 (2005) 33
- Development and evaluation of a new  $^{155}\text{Eu}/^{154}\text{SmPd}_3$  source for use with  $^{155}\text{Gd}$  Mössbauer spectroscopy, J. Wang, M. Takeda and T. Shishido 340 (2005) 52
- Determination of boron in Zr–Nb alloys by glow discharge quadrupole mass spectrometry, R. Shekhar, J. Arunachalam, G. Radha Krishna, H.R. Ravindra and B. Gopalan 340 (2005) 284

### Atom Probe/Field Ion Microscopy

- Hardening and microstructural evolution in A533B steels under high-dose electron irradiation, K. Fujii, K. Fukuya, N. Nakata, K. Hono, Y. Nagai and M. Hasegawa 340 (2005) 247

### Carbon

- Tritium release behavior from the graphite tiles used at the dome unit of the W-shaped divertor region in JT-60U, K. Katayama, T. Takeishi, Y. Manabe, H. Nagase, M. Nishikawa and N. Miya 340 (2005) 83
- Thermal conductivity degradation of ceramic materials due to low temperature, low dose neutron irradiation, L.L. Snead, S.J. Zinkle and D.P. White 340 (2005) 187
- The response of several luminescent materials to keV and MeV ions, K.J. McCarthy, J.G. López, D.J. Rey, B. Zurro, A. Ibarra, A. Baciero and M.A. Respaliza 340 (2005) 291

### Ceramics (*not listed elsewhere*)

- Influence on the structural characteristic of defect solid solution  $\text{Gd}_x\text{Zr}_{1-x}\text{O}_{2-x/2}$  with  $0.18 \leq x \leq 0.62$ , J. Wang, M. Takeda and A. Nakamura 340 (2005) 33
- Thermal conductivity degradation of ceramic materials due to low temperature, low dose neutron irradiation, L.L. Snead, S.J. Zinkle and D.P. White 340 (2005) 187
- The response of several luminescent materials to keV and MeV ions, K.J. McCarthy, J.G. López, D.J. Rey, B. Zurro, A. Ibarra, A. Baciero and M.A. Respaliza 340 (2005) 291

### Chemical Reactions (*includes Electrochemical and Thermochemical Reactions*)

- Chlorination of  $\text{UO}_2$ ,  $\text{PuO}_2$  and rare earth oxides using  $\text{ZrCl}_4$  in  $\text{LiCl}$ – $\text{KCl}$  eutectic melt, Y. Sakamura, T. Inoue, T. Iwai and H. Moriyama 340 (2005) 39
- Development and evaluation of a new  $^{155}\text{Eu}/^{154}\text{SmPd}_3$  source for use with  $^{155}\text{Gd}$  Mössbauer spectroscopy, J. Wang, M. Takeda and T. Shishido 340 (2005) 52
- Corrosion behavior of Zr alloys with a high Nb content, J.-Y. Park, B.-K. Choi, Y.H. Jeong and Y.-H. Jung 340 (2005) 237

- Self-reduction of dioxoplutonium VI: Characterization and modeling of radiolytic and disproportionation pathways, J.M. Haschke 340 (2005) 299
- Compatibility and Corrosion** (*includes Stress Corrosion Cracking*)
- Elemental dissolution study of Pu-bearing borosilicate glasses, D.M. Wellman, J.P. Icenhower and W.J. Weber 340 (2005) 149
- Corrosion behavior of Zr alloys with a high Nb content, J.-Y. Park, B.-K. Choi, Y.H. Jeong and Y.-H. Jung 340 (2005) 237
- Diffusion**
- Densification behaviour and sintering kinetics of ( $U_{0.45}Pu_{0.55}$ )C pellets, T.R.G. Kutty, K.B. Khan, P.S. Kutty, C.B. Basak, A.K. Sengupta, R.S. Mehrotra, S. Majumdar and H.S. Kamath 340 (2005) 113
- Mechanism of dynamic strain aging and characterization of its effect on the low-cycle fatigue behavior in type 316L stainless steel, S.-G. Hong and S.-B. Lee 340 (2005) 307
- Divertor Materials**
- Tritium release behavior from the graphite tiles used at the dome unit of the W-shaped divertor region in JT-60U, K. Katayama, T. Takeishi, Y. Manabe, H. Nagase, M. Nishikawa and N. Miya 340 (2005) 83
- Electrical Properties**
- Electrical conductivity and non-stoichiometry in the ( $U,Gd$ ) $O_{2\pm x}$  system, J.H. Yang, K.S. Kim, K.W. Kang, K.W. Song and Y.H. Jung 340 (2005) 171
- Electron Irradiation**
- Analysis of molecular oxygen formation in irradiated glasses: a Raman depth profile study, N. Ollier, B. Boizot, B. Reynard, D. Ghaleb and G. Petite 340 (2005) 209
- Hardening and microstructural evolution in A533B steels under high-dose electron irradiation, K. Fujii, K. Fukuya, N. Nakata, K. Hono, Y. Nagai and M. Hasegawa 340 (2005) 247
- Electron Microscopy**
- Mechanism of irradiation assisted stress corrosion crack initiation in thermally sensitized 304 stainless steel, T. Onchi, K. Dohi, N. Soneda, M. Navas and M.L. Castaño 340 (2005) 219
- Embrittlement**
- Hardening and microstructural evolution in A533B steels under high-dose electron irradiation, K. Fujii, K. Fukuya, N. Nakata, K. Hono, Y. Nagai and M. Hasegawa 340 (2005) 247
- Fabrication**
- Fabrication and microstructure characterization of inert matrix fuel based on yttria stabilized zirconia, Ch. Hellwig, M. Pouchon, R. Restani, F. Ingold and G. Bart 340 (2005) 163
- Fatigue**
- Mechanism of dynamic strain aging and characterization of its effect on the low-cycle fatigue behavior in type 316L stainless steel, S.-G. Hong and S.-B. Lee 340 (2005) 307
- Fission Products**
- Thermodynamic considerations and prediction of the primary coolant activity of  $^{99}Tc$ , B.J. Lewis, W.T. Thompson, F. Akbari, C. Morrison and A. Husain 340 (2005) 69
- Electrical conductivity and non-stoichiometry in the ( $U,Gd$ ) $O_{2\pm x}$  system, J.H. Yang, K.S. Kim, K.W. Kang, K.W. Song and Y.H. Jung 340 (2005) 171
- Fracture and Fracture Toughness**
- Temperature effects on the static and dynamic fracture behaviors of low-silicon CA-15 tempered stainless steel castings, C.-H. Hsu and H.-Y. Teng 340 (2005) 1
- Mechanism of dynamic strain aging and characterization of its effect on the low-cycle fatigue behavior in type 316L stainless steel, S.-G. Hong and S.-B. Lee 340 (2005) 307
- Fuels and Fuel Elements**
- Thermodynamic considerations and prediction of the primary coolant activity of  $^{99}Tc$ , B.J. Lewis, W.T. Thompson, F. Akbari, C. Morrison and A. Husain 340 (2005) 69
- Heat Treatment**
- Influence on the structural characteristic of defect solid solution  $Gd_xZr_{1-x}O_{2-x/2}$  with  $0.18 \leq x \leq 0.62$ , J. Wang, M. Takeda and A. Nakamura 340 (2005) 33
- Helium**
- The effect of neutron irradiation on mechanical properties of YAG laser weldments using previously irradiated material, H. Yamada, H. Kawamura, K. Tsuchiya, G. Kalinin, Y. Nagao, F. Takada and M. Nishikawa 340 (2005) 57
