

Subject Index of Volume 483

- Absorption spectra
Optical parameters and absorption of copper (II)-azo complexes thin films as optical recording media, 251
- AFM
Macro-, micro- and nano-investigations on 3-aminopropyltrimethoxysilane self-assembly-monolayers, 306
- Aging mechanism
Study of degradation mechanism of blue light emitting diodes, 378
- Alloy
Influence of molybdate species added to sulphuric acid on composition and morphology of the anodic layers formed on 2024 aluminium alloy, 197
- Aluminium oxide
Influence of molybdate species added to sulphuric acid on composition and morphology of the anodic layers formed on 2024 aluminium alloy, 197
Effects of slurry components on the surface characteristics when chemical mechanical polishing NiP/Al substrate, 400
- Aluminum nitride
Microscopic investigations of aluminum nitride thin films grown by low-temperature reactive sputtering, 16
- Amorphous carbon nitride
Study on amorphous carbon nitride film prepared by facing target sputtering, 169
- Anisotropy
Through-plane uniformity of optical anisotropy in spin-coated biphenyl dianhydride-*p*-phenylenediamine films, 226
Simultaneous determination of the thickness and the dispersion of the dielectric constant of a Langmuir–Blodgett film deposited on a CaF₂ plate, 312
- Annealing
Influence of annealing on the properties of ZnO:Ga films prepared by radio frequency magnetron sputtering, 296
- Anodic films
Anodisation of sputtered titanium films: an electrochemical and electrochemical quartz crystal microbalance study, 205
- Anodisation
Anodisation of sputtered titanium films: an electrochemical and electrochemical quartz crystal microbalance study, 205
- Antimony bismuth telluride
Comparative study of the electrochemical preparation of Bi₂Te₃, Sb₂Te₃, and (Bi_xSb_{1-x})₂Te₃ films, 44
- ASP
Surface-modified polymeric pads for enhanced performance during chemical mechanical planarization, 261
- Atomic force microscopy
Microscopic investigations of aluminum nitride thin films grown by low-temperature reactive sputtering, 16
- Atomic force microscopy (AFM)
Atomic force microscope characterization of poly(ethyleneimine)/poly(ethylene-co-maleic acid) and poly(ethyleneimine)/poly(styrene sulfonate) multilayers, 114
- Boron nitride
Peculiar deformation characteristics of turbostratic boron nitride thin film, 218
- Bragg mirror
α-Si/SiO_x Bragg-reflectors on micro-structured InP, 257
- Brewster angle microscopy (BAM)
Effect of deoxyribonucleic acid interaction on the interfacial properties of a fluid functionalized lipidic matrix, 319
- Buffer layer
Diamond-like carbon as a buffer layer in polymeric electroluminescent device, 351
- Carbides
Wear properties of niobium carbide coatings performed by pack method on AISI 1040 steel, 152
- Carbon
Mechanical strength and thermally induced stress voids of carbon-coated optical fibers prepared by plasma enhanced chemical vapor deposition method with different hydrogen/methane ratio, 140
- Carbon nitride
Synthesis of carbon nitride thin films by low-energy ion beam assisted evaporation: on the mechanisms for fullerene-like microstructure formation, 89
- Carrier density
Controlling carrier density and its effect on I–V characteristics of the anatase–TiO₂ thin films prepared by a sputter deposition method, 147
- CdIn₂O₄
Point-defects-induced band edge displacements and band-gap narrowing in CdIn₂O₄ thin films, 245
- Channel effect
Effect of Argon ion irradiation on grain orientation in *platinum* thin films, 411
- Charge separation
Controlling carrier density and its effect on I–V characteristics of the anatase–TiO₂ thin films prepared by a sputter deposition method, 147
- Chemical vapor deposition
Effects of seeding methods on the fabrication of microcrystalline silicon solar cells using radio frequency plasma enhanced chemical vapor deposition, 84
Mechanical strength and thermally induced stress voids of carbon-coated optical fibers prepared by plasma enhanced chemical vapor deposition method with different hydrogen/methane ratio, 140

- Chemical vapor deposition (CVD)
 Characterization of low temperature photo-assisted metal-organic chemical vapor deposited copper films using hexafluoroacetylacetonate copper(I) trimethylvinylsilane as precursor, 10
- Chlorine
 Effects of fluorine and chlorine on the gate oxide integrity of W/TiN/SiO₂/Si metal-oxide-semiconductor structure, 232
- CMP
 Surface-modified polymeric pads for enhanced performance during chemical mechanical planarization, 261
- Coatings
 Sol-gel-derived corrosion-protective coatings with controllable release of incorporated organic corrosion inhibitors, 191
- Coercive field
 Crystalline structures and ferroelectric properties of ultrathin films of vinylidene fluoride and trifluoroethylene copolymer, 340
- Colloidal crystals
 High quality ordered macroporous titania films with large filling fraction, 136
- columnar nanocomposite film
 ZnO/CdTe/CuSCN, a promising heterostructure to act as inorganic *eta*-solar cell, 372
- Combinatorial sputtering
 Process enhanced polaron conductivity of infrared transparent nickel-cobalt oxide, 175
- Combustion chemical vapor deposition
 Nanohardness and fracture toughness of combustion chemical vapor deposition deposited yttria stabilized zirconia-alumina films, 211
- Composite
 Dispersion of nanosized noble metals in TiO₂ matrix and their photoelectrode properties, 276
- Composites
 Nanohardness and fracture toughness of combustion chemical vapor deposition deposited yttria stabilized zirconia-alumina films, 211
- Conductor formation mechanisms
 Laser direct fabrication of silver conductors on glass boards, 270
- Copper
 Characterization of low temperature photo-assisted metal-organic chemical vapor deposited copper films using hexafluoroacetylacetonate copper(I) trimethylvinylsilane as precursor, 10
- Copper (II)-azo complexes
 Optical parameters and absorption of copper (II)-azo complexes thin films as optical recording media, 251
- Corrosion
 Sol-gel-derived corrosion-protective coatings with controllable release of incorporated organic corrosion inhibitors, 191
- Curved micro structure
a-Si/SiO_x Bragg-reflectors on micro-structured InP, 257
- CVD
 Initial growth of chemical-vapor-deposited Ru from bis(hexafluoroacetylacetonate)dicarbonyl ruthenium, 31
- Cyclodextrin
 Sol-gel-derived corrosion-protective coatings with controllable release of incorporated organic corrosion inhibitors, 191
- DC magnetron sputtering
 Spontaneous nickel monosilicide nanowire formation by metal induced growth, 60
- Deposition
 Preparation of AlCuFe quasicrystalline film by pulsed laser-arc deposition, 1
- Deposition process
 Characterization of low temperature photo-assisted metal-organic chemical vapor deposited copper films using hexafluoroacetylacetonate copper(I) trimethylvinylsilane as precursor, 10
- Nanostructured zinc oxide films grown from microwave activated aqueous solutions, 79
- Thin films of endohedral metallofullerenes embedded in polythiophene: a facile electrochemical preparation, 95
- Wear properties of niobium carbide coatings performed by pack method on AISI 1040 steel, 152
- Diamond like carbon
 Diamond-like carbon as a buffer layer in polymeric electroluminescent device, 351
- Dielectrics
 A chemical kinetics model for a mixed-abrasive chemical mechanical polishing, 239
- Doping
 Infinite-layer (Ca_{1-x}Sr_xCuO₂) film growth by molecular beam epitaxy and effect of hole doping, 301
- Efros and Shklovskii
 Electrical and galvanomagnetic properties of nanocrystalline gallium nitride films, 287
- Elastic properties
 Peculiar deformation characteristics of turbostratic boron nitride thin film, 218
- Electrical properties
 Process enhanced polaron conductivity of infrared transparent nickel-cobalt oxide, 175
- Electrical properties and measurement
 Influence of annealing on the properties of ZnO:Ga films prepared by radio frequency magnetron sputtering, 296
- Electrochemical quartz crystal microbalance
 Electrochemical and mass variation behaviour of rhodium oxide electrodes prepared by the polymeric precursor method, 164
- Electrochemical quartz microbalance
 Study of the electrodeposition of rhenium thin films by electrochemical quartz microbalance and X-ray photoelectron spectroscopy, 50
- Electrochemistry
 Thin films of endohedral metallofullerenes embedded in polythiophene: a facile electrochemical preparation, 95
- Electrochemistry (113)
 Comparative study of the electrochemical preparation of Bi₂Te₃, Sb₂Te₃, and (Bi_xSb_{1-x})₂Te₃ films, 44
- Electrochromic
 The electrochromic behavior of nickel oxide films sprayed at different preparative conditions, 330
- Electrodeposition
 Study of the electrodeposition of rhenium thin films by electrochemical quartz microbalance and X-ray photoelectron spectroscopy, 50
- Electroluminescent devices
 Diamond-like carbon as a buffer layer in polymeric electroluminescent device, 351
- Electronic pastes
 Laser direct fabrication of silver conductors on glass boards, 270
- Ellipsometry
a-Si/SiO_x Bragg-reflectors on micro-structured InP, 257
- Epitaxy
 Synthesis of epitaxial GaN single-crystalline film by ultra high vacuum r.f. magnetron sputtering method, 38
- EQCM
 Anodisation of sputtered titanium films: an electrochemical and electrochemical quartz crystal microbalance study, 205
- eta*-solar cells
 ZnO/CdTe/CuSCN, a promising heterostructure to act as inorganic *eta*-solar cell, 372
- Europium
 Pulsed laser deposition and characterization of europium borate glass films, 27
