Special Issue: THE IN VITRO GAS PRODUCTION TECHNIQUE: LIMITATIONS AND OPPORTUNITIES

Preface

The in vitro gas production technique: Limitations and opportunities

U. Krishnamoorthy (Bangalore, India), C. Rymer (Reading, UK) and P.H. Robinson (Davis, CA, USA) 1

History, Current Methodological Issues and Future Challenges

In vitro cumulative gas production techniques: History, methodological considerations and challenges

C. Rymer (Reading, UK), J.A. Huntington (Newport, UK), B.A. Williams (Wageningen, The Netherlands) and D.I. Givens (Reading, UK) 9

Methodological Issues

In vitro microbial inoculum: A review of its function and properties

F.L. Mould, K.E. Kliem, R. Morgan and R.M. Mauricio (Reading, UK) 31

Comparative analysis of gas production profiles obtained with buffalo and sheep ruminal fluid as the source of inoculum

S. Calabrò (Napoli, Italy), S. López (León, Spain), V. Piccolo (Napoli, Italy), J. Dijkstra (Wageningen, The Netherlands), M.S. Dhanoa (Dyfed, UK) and J. France (Guelph, Canada) 51

Impact of season of harvest on in vitro gas production and dry matter degradability of *Acacia saligna* leaves with inoculum from three ruminant species

A.-F.Z.M. Salem (Alexandria, Egypt) 67

Comparison of two in vitro fermentation gas production methods using both rumen fluid and faecal inoculum from sheep

Z. Váradyová, M. Baran and I. Zeleňák (Košice, Slovak Republic) 81

Influence of inoculum source in a gas production method

I.C.S. Bueno, S.L.S. Cabral Filho, S.P. Gobbo, H. Louvandini, D.M.S.S. Vitti and A.L. Abdalla (Brazil) 95

Effect of preservation on fermentative activity of rumen fluid inoculum for in vitro gas production techniques

G. Hervás, P. Frutos, F.J. Giráldez, M.J. Mora, B. Fernández and Á.R. Mantecón (León, Spain) 107

Effect of drying method on estimated nutritive value of browse species using an in vitro gas production technique

Z.M. Parissi (Thessaloniki, Greece), T.G. Papachristou (Vassilika, Greece) and A.S. Nastis (Thessaloniki, Greece) 119

In vitro fermentation kinetics of fresh and dried silage	
S. Calabrò, M.I. Cutrignelli, G. Piccolo, F. Bovera, F. Zicarelli, M.P. Gazaneo and F. Infascelli (Napoli, Italy)	129
Effects of particle size of a total mixed ration on in vivo ruminal fermentation patterns and inocula characteristics used for in vitro gas production	
M. Tafaj, Q. Zebeli, B. Junck, H. Steingass and W. Drochner (Stuttgart, Germany)	139
A review and simplification of the in vitro incubation medium	
F.L. Mould, R. Morgan, K.E. Kliem and E. Krystallidou (Reading, UK)	155
Using an in vitro gas production technique to examine feed additives: Effects of correcting values for different blanks	
M.D. Carro, M.J. Ranilla and M.L. Tejido (León, Spain)	173
Interference of indirect gas produced by grass silage fermentation acids in an in vitro gas production technique	
M.J.A. Palmer, N.S. Jessop, R. Fawcett (Edinburgh, UK) and A.W. Illius (UK)	185
Estimation of direct and indirect gas production in syringes: A tool to estimate short chain fatty acid production that requires minimal laboratory facilities	
V. Fievez (Melle, Belgium), O.J. Babayemi (Nigeria) and D. Demeyer (Melle, Belgium)	197
A novel, wireless, automated system for measuring fermentation gas production kinetics of feeds and its application to feed characterization	
A.T. Adesogan, N.K. Krueger (Florida, USA) and S.C. Kim (Florida, USA and Jinju, South Korea)	211
Inter-laboratory Repeatability	
Inter-laboratory variation of in vitro cumulative gas production profiles of feeds using manual and automated methods	
C. Rymer (Stratford upon Avon, UK), B.A. Williams (Marijkeweg, The Netherlands), A.E. Brooks, D.R. Davies (Aberystwyth, UK) and D.I. Givens (Stratford upon Avon, UK)	225
Ranking of in vitro fermentability of 20 feedstuffs with an automated gas production technique: Results of a ring test	
A.H. van Gelder (Lelystad, The Netherlands), M. Hetta (Umea, Sweden), M.A.M. Rodrigues (Vila Real, Portugal), J.L. De Boever (Melle, Belgium), H. Den Hartigh (Lelystad, The Netherlands), C. Rymer (Stratford upon Avon, UK), M. van Oostrum (Oosterbeek, The Netherlands), R. van Kaathoven (Veghel, The Netherlands) and J.W. Cone (Lelystad, The Netherlands)	243
Applications to Feed Nutritive Evaluation	
Evaluation of the nutritive value of maize silages using a gas production technique	
J.L. De Boever, J.M. Aerts, J.M. Vanacker and D.L. De Brabander (Melle, Belgium)	255
A gas production technique as a tool to predict organic matter digestibility of grass and maize silage	
A. García-Rodríguez, N. Mandaluniz (Vitoria-Gasteiz, Spain), G. Flores (Coruña, Spain) and L.M. Oregui (Vitoria-Gasteiz, Spain)	267
Assessment of tree fodder preference by cattle using chemical composition, in vitro gas production and in situ degradability	
C.A. Sandoval-Castro, H.L. Lizarraga-Sanchez and F.J. Solorio-Sanchez (Yucatán, México)	277
Applications to Feed Secondary Compounds	
In vitro gas methods for evaluation of feeds containing phytochemicals	
H.P.S. Makkar (Vienna, Austria)	291
In vitro gas production and its relationship to in situ disappearance and chemical composition of some Mediterranean browse species	
A. Gasmi-Boubaker, C. Kayouli (Tunis, Tunisia) and A. Buldgen (Gembloux, Belgium)	303
Defaunating capacity of tropical fodder trees: Effects of polyethylene glycol and its relationship to in vitro gas production	
G.E. Monforte-Briceño, C.A. Sandoval-Castro, L. Ramírez-Avilés and C.M.C. Leal (Yucatán, México)	313
