This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

### Highlights

- " An approach to characterize and evaluate the quality of Product Lifecycle Management Software Systems in the context of large enterprises in the aeronautical industry is provided.
- " This solution is based on QuEF (Quality Evaluation Framework), adapted to offer a dynamic framework to select the best PLM solution for a particular environment
- " This solution supports both static and dynamic aspects, which could be customized for each situation.
