Title: Effect of operational conditions on photocatalytic ethylene degradation applied to control tomato ripening

Authors: Alex Basso, Regina de Fátima Peralta Muniz Moreira, Humberto Jorge José

PII: S1010-6030(18)30849-9
DOI: <https://doi.org/10.1016/j.jphotochem.2018.08.027>
Reference: JPC 11441

To appear in: *Journal of Photochemistry and Photobiology A: Chemistry*

Received date: 15-6-2018
Revised date: 17-8-2018
Accepted date: 20-8-2018

Please cite this article as: Basso A, de Fátima Peralta Muniz Moreira R, José HJ, Effect of operational conditions on photocatalytic ethylene degradation applied to control tomato ripening, *Journal of Photochemistry and Photobiology, A: Chemistry* (2018), <https://doi.org/10.1016/j.jphotochem.2018.08.027>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

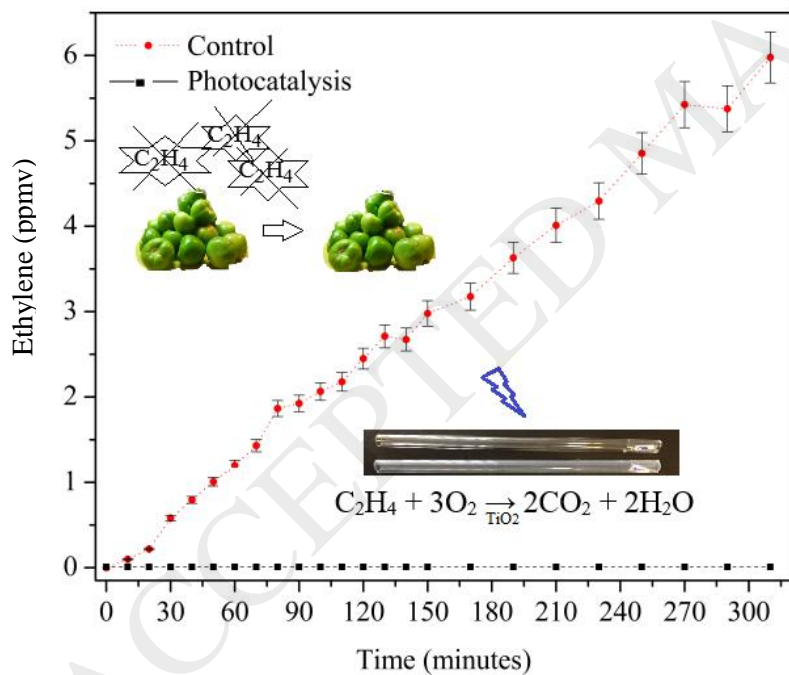

Effect of operational conditions on photocatalytic ethylene degradation applied to control tomato ripening
