Flow of a yield-stress fluid over a cavity: experimental and numerical investigation of a viscoplastic boundary layer

Paul Vigneaux, Guillaume Chambon, Arthur Marly, Li-Hua Luu, Pierre Philippe

PII: S0377-0257(18)30191-5
DOI: <https://doi.org/10.1016/j.jnnfm.2018.08.005>
Reference: JNNFM 4040

To appear in: *Journal of Non-Newtonian Fluid Mechanics*

Received date: 30 May 2018
Revised date: 1 August 2018
Accepted date: 12 August 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- cross-comparison of experimental and numerical results of viscoplastic boundary layer
- refined analysis of the viscoplastic boundary layer at moderate Bingham numbers
- Oldroyd's scaling remains true by considering the stress-increase zone of the boundary layer
