

# Author's Accepted Manuscript

Atomic force microscopy measurements probing the mechanical properties of single collagen fibrils under the influence of UV light in situ

Marcus Schulze, Melanie Rogge, Robert W. Stark

PII: S1751-6161(18)30772-0  
DOI: <https://doi.org/10.1016/j.jmbbm.2018.08.039>  
Reference: JMBBM2950

To appear in: *Journal of the Mechanical Behavior of Biomedical Materials*

Received date: 5 October 2017  
Revised date: 6 June 2018  
Accepted date: 27 August 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting galley proof before it is published in its final citable form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
