Title: Quantification of oxygenated polycyclic aromatic hydrocarbons in ambient aerosol samples using in-injection port thermal desorption-gas chromatography/mass spectrometry: method exploration and validation

Authors: Lijuan Li, Steven Sai Hang Ho, Judith C. Chow, John G. Watson, Linli Qu, Liqin Wang, Junji Cao

PII: S1387-3806(18)30106-4
DOI: <https://doi.org/10.1016/j.ijms.2018.08.005>
Reference: MASPEC 15989

To appear in: *International Journal of Mass Spectrometry*

Received date: 17-4-2018
Revised date: 13-8-2018
Accepted date: 14-8-2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Quantification of oxygenated polycyclic aromatic hydrocarbons in ambient aerosol samples using in-injection port thermal desorption-gas chromatography/mass spectrometry: method exploration and validation
