Selective release of overexpressed recombinant proteins from *E. coli* cells facilitates one-step purification of peptide-tagged green fluorescent protein variants

Yasmin Kaveh-Baghbaderani, Silvia Angela Blank-Shim, Tobias Koch, Sonja Berensmeier

PII: S1046-5928(18)30348-6

DOI: [10.1016/j.pep.2018.07.014](https://doi.org/10.1016/j.pep.2018.07.014)

Reference: YPREP 5307

To appear in: *Protein Expression and Purification*

Received Date: 28 June 2018

Revised Date: 25 July 2018

Accepted Date: 27 July 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Correspondence: Prof. Dr. Sonja Berensmeier, Bioseparation Engineering Group, Department of Mechanical Engineering, Technical University of Munich, Boltzmannstr. 15, 85748 Garching, Germany.

E-mail: s.berensmeier@tum.de

Keywords: selective release; selective liberation; one-step; freeze-thaw; protein purification; green fluorescent protein GFP

Abbreviations: %B, percentage of elution buffer; AEC, anion exchange chromatography; BCA, bicinchoninic acid; CV, column volume, GFP, green fluorescent protein; HCP, host cell protein; IEF, isoelectric focusing; IMAC, immobilized metal ion affinity chromatography; OD, optical density; pI, isoelectric point
