This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Red light and green light increase egg production of pigeons.
- Violet light reduces both egg production and E₂ concentration of pigeons.

Red light improves *ERβ* expression in the ovary and *AR* expression in the testi
