Current status and future development of infectious cell-culture models for the major genotypes of hepatitis C virus: Essential tools in testing of antivirals and emerging vaccine strategies

Santseharay Ramirez, Jens Bukh

PII: S0166-3542(18)30327-9

DOI: [10.1016/j.antiviral.2018.07.014](https://doi.org/10.1016/j.antiviral.2018.07.014)

Reference: AVR 4335

To appear in: *Antiviral Research*

Received Date: 24 May 2018

Revised Date: 17 July 2018

Accepted Date: 20 July 2018

Please cite this article as: Ramirez, S., Bukh, J., Current status and future development of infectious cell-culture models for the major genotypes of hepatitis C virus: Essential tools in testing of antivirals and emerging vaccine strategies, *Antiviral Research* (2018), doi: 10.1016/j.antiviral.2018.07.014.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
