This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Identification of essential yeast genes involved in polyamine resistance

Mustapha Aouida¹ and Dindial Ramotar²

Running title: Essential targets that alter polyamine resistance

¹ College of Sciences and Engineering, Life Science Division, Hamad Bin Khalifa University, Doha, Qatar.

² Maisonneuve-Rosemont Hospital, Research Center, Université de Montréal, Department of Medicine, 5415 Boul. de L' Assomption, Montréal, Québec H1T 2M4, Canada.
