This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- MS natural history: time rates of relapse, EDSS score evolution and disease progression rate
- MS real world modifying treatment management and its evolution since 1990
- Real world effectiveness of MS modifying treatment on relapses and EDSS
- Real world persistence and adherence of MS modifying treatments
