Molecular resolution to a morphological controversy: the case of North American fossil muskoxen *Bootherium* and *Symbos*

Pere Bover, Bastien Llamas, Vicki A. Thomson, Joan Pons, Alan Cooper, Kieren J. Mitchell

PII: S1055-7903(18)30290-2
DOI: <https://doi.org/10.1016/j.ympev.2018.08.008>
Reference: YMPEV 6255

To appear in: *Molecular Phylogenetics and Evolution*

Received Date: 7 May 2018
Revised Date: 8 August 2018
Accepted Date: 10 August 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Molecular resolution to a morphological controversy: the case of North American fossil muskoxen *Bootherium* and *Symbos*
