

## Subject index

### Volume 98 (2005)

- Absence;** Pericardium; Congenital **98**, 21
- ACE inhibitor;** AT1 receptor antagonist; In-stent-restenosis; Acute coronary syndrome **98**, 331
- Acute coronary syndrome;** ACE inhibitor; AT1 receptor antagonist; In-stent-restenosis **98**, 331
- Acute coronary syndromes;** CD14 receptor; Polymorphism; Coronary artery disease; Angina pectoris **98**, 307
- Adhesion molecules;** Diabetes mellitus; Hypertension **98**, 39
- Adults;** Coronary artery fistulas; Surgical treatment **98**, 57
- Age;** Coronary; Calcium; Risk factors **98**, 325
- Alcohol;** Homocysteine; Cardiovascular; Risk factors; Diet; Coffee **98**, 471
- Amiodarone;** Low back pain; Side effects; Atrial fibrillation; Lumbar pain **98**, 355
- Amplatzer septal occluder;** Atrial septal defects; Platelets; Coagulation **98**, 107
- Aneurysm;** Mitral valve; Endocarditis **98**, 163
- Aneurysm;** Complications; Echocardiography; Myocardial infarction **98**, 165
- Angina pectoris;** CD14 receptor; Polymorphism; Coronary artery disease; Acute coronary syndromes **98**, 307
- Anginal attack frequency;** Ischaemic heart disease; Stable angina pectoris; Treatment of anginal attacks **98**, 299
- Angiography;** Obesity; Body mass index; Body fat; Coronary atherosclerosis **98**, 227
- Angioplasty;** Stress echocardiography; Dipyridamole echocardiography; Exercise echocardiography; Dobutamine echocardiography; Restenosis; PTCA **98**, 191
- Angioplasty;** HMG-CoA reductase inhibitors; Coronary disease; Cholesterol **98**, 479
- Angiotensin I-converting enzyme genotype;** Fatigue **98**, 339
- Angiotensin system;** Renin; Haemostasis; Coronary artery bypass graft; Gene–environment interactions **98**, 133
- Antihistamines;** Diphenhydramine; Electrocardiogram; QT interval; Long QT syndrome; Torsade de pointes; Drug toxicity; Right bundle branch block; Wide complex tachycardia **98**, 341
- Arrhythmias;** Ventricular pre-excitation; Electrophysiological study; Sudden death **98**, 207
- Arteriosclerosis;** Atherosclerosis; Pulse volume recording **98**, 99
- AT1 receptor antagonist;** ACE inhibitor; In-stent-restenosis; Acute coronary syndrome **98**, 331
- Atherosclerosis;** IL-8; Unstable angina; Inflammation **98**, 45
- Atherosclerosis;** Arteriosclerosis; Pulse volume recording **98**, 99
- Atherosclerosis;** C-reactive protein; Statins **98**, 199
- Atherosclerosis;** Stroke; Coronary artery bypass grafting; Cerebrovascular disease; Carotid endarterectomy **98**, 261
- Atherosclerosis;** Endothelial dysfunction; Coenzyme Q<sub>10</sub> (CoQ<sub>10</sub>); Flow-mediated vasodilatation (FMD%); Cerivastatin **98**, 413
- Atherosclerosis;** Carotid glomus; Carotid sinus; Stroke; Baroreceptors **98**, 439
- Atrial fibrillation;** Microalbuminuria; C-reactive protein **98**, 73
- Atrial fibrillation;** Electrical remodeling; Mechanical remodeling; Electrophysiology; Transesophageal echocardiography **98**, 91
- Atrial fibrillation;** Telecardiology; Telemedicine **98**, 215
- Atrial fibrillation;** Amiodarone; Low back pain; Side effects; Lumbar pain **98**, 355
- Atrial septal defects;** Amplatzer septal occluder; Platelets; Coagulation **98**, 107
- Autonomic function;** Chemoreflex; Ergoreflex; Chronic heart failure; Multiple organ dysfunction syndrome **98**, 369

- Autonomic nervous system;** Heart rate variability; Human **98**, 493
- Baroreceptors;** Carotid glomus; Carotid sinus; Atherosclerosis; Stroke **98**, 439
- Basedow's disease;** Marfan syndrome; Factor VII deficiency; Gene mutation **98**, 345
- Blood pressure;** Caffeine; Wave reflections; Central hemodynamics **98**, 425
- Blood vessels;** Medical history; History of Cardiology; Circulatory system; Heart **98**, 519
- Body fat;** Obesity; Body mass index; Coronary atherosclerosis; Angiography **98**, 227
- Body mass index;** Obesity; Body fat; Coronary atherosclerosis; Angiography **98**, 227
- Bosentan;** Eisenmenger; Pulmonary hypertension; Endothelin antagonists **98**, 147
- Breathlessness;** Heart failure; Patient descriptions **98**, 61
- Breathlessness;** Pulmonary hypertension; Heart failure **98**, 529
- Bridge to recovery;** Left ventricular assist device; Heart failure; Immunohistochemistry; Contractile proteins; Sarcomere structure **98**, 465
- Burden of disease;** Exercise training; Heart failure; Hospitalisation; Mortality **98**, 487
- Caffeine;** Blood pressure; Wave reflections; Central hemodynamics **98**, 425
- Calcium;** Coronary; Age; Risk factors **98**, 325
- Cardiac arrest;** Myocardial infarction; Percutaneous coronary intervention **98**, 359
- Cardiac involvement;** Wegener's granulomatosis; Renal biopsy **98**, 337
- Cardiac rupture;** Infarction; Dobutamine stress echocardiography **98**, 349
- Cardiac toxins;** Cardiac troponins; Diphtheria; Corynebacterium diphtheriae; Myocarditis; Toxic myocarditis; Reversible myocardial injury; Left ventricular dysfunction; Heart **98**, 351
- Cardiac troponins;** Diphtheria; Corynebacterium diphtheriae; Myocarditis; Toxic myocarditis; Cardiac toxins; Reversible myocardial injury; Left ventricular dysfunction; Heart **98**, 351
- Cardiac troponin-T;** Myocardial ischemia; Myoglobin **98**, 285
- Cardiomyocyte;** Gap junctions; Cardiomyopathy; P2X<sub>1</sub> receptor **98**, 291
- Cardiomyopathy;** Hypertrophy; Drugs; Pressure **98**, 141
- Cardiomyopathy;** Electron microscopic findings; Limb girdle muscular dystrophy **98**, 161
- Cardiomyopathy;** P2X<sub>1</sub> receptor; Cardiomyocyte; Gap junctions **98**, 291
- Cardiomyopathy;** Congestive heart failure; Syncope; Defibrillators; Implantable **98**, 395
- Cardiomyopathy;** Myocardial infarction; Left main trunk **98**, 507
- Cardiovascular;** Homocysteine; Risk factors; Diet; Alcohol; Coffee **98**, 471
- Cardiovascular pharmacotherapy;** Herbal medicines; Drug interaction **98**, 1
- Cardiovascular system;** Pregnancy; Fetus **98**, 179
- Carotid endarterectomy;** Stroke; Coronary artery bypass grafting; Cerebrovascular disease; Atherosclerosis **98**, 261
- Carotid glomus;** Carotid sinus; Atherosclerosis; Stroke; Baroreceptors **98**, 439
- Carotid sinus;** Carotid glomus; Atherosclerosis; Stroke; Baroreceptors **98**, 439
- CD14 receptor;** Polymorphism; Coronary artery disease; Acute coronary syndromes; Angina pectoris **98**, 307
- Central hemodynamics;** Caffeine; Blood pressure; Wave reflections **98**, 425
- Cerebrovascular disease;** Stroke; Coronary artery bypass grafting; Atherosclerosis; Carotid endarterectomy **98**, 261
- Cerivastatin;** Atherosclerosis; Endothelial dysfunction; Coenzyme Q<sub>10</sub> (CoQ<sub>10</sub>); Flow-mediated vasodilatation (FMD%) **98**, 413
- Chemoreflex;** Ergoreflex; Autonomic function; Chronic heart failure; Multiple organ dysfunction syndrome **98**, 369
- Cholesterol;** HMG-CoA reductase inhibitors; Coronary disease; Angioplasty **98**, 479
- Chronic heart failure;** Chemoreflex; Ergoreflex; Autonomic function; Multiple organ dysfunction syndrome **98**, 369
- Circulatory system;** Medical history; History of Cardiology; Blood vessels; Heart **98**, 519
- Circumflex;** Coronary abnormalities **98**, 527
- Coagulation;** Atrial septal defects; Amplatzer septal occluder; Platelets **98**, 107
- Coding;** Segmental coding system; Coronary angiography; Formulation; Reporting **98**, 113
- Coenzyme Q<sub>10</sub> (CoQ<sub>10</sub>);** Atherosclerosis; Endothelial dysfunction; Flow-mediated vasodilatation (FMD%); Cerivastatin **98**, 413
- Coffee;** Homocysteine; Cardiovascular; Risk factors; Diet; Alcohol **98**, 471
- Complications;** Aneurysm; Echocardiography; Myocardial infarction **98**, 165
- Complications;** Retroperitoneal Haematoma; Enoxaparin **98**, 523
- Congenital;** Pericardium; Absence **98**, 21
- Congenital heart disease;** Menstruation; Contraception **98**, 379
- Congenitally corrected transposition;** Myocardial bridging **98**, 503
- Congestive heart failure;** Cardiomyopathy; Syncope; Defibrillators; Implantable **98**, 395
