Contents Volume 21, 2008

NEURAL NETWORKS

Volume 21, Number 1

January 2008

CONTENTS

K. Doya, S. Grossberg, J.G. Taylor

- 1** Neural Networks goes electronic at twenty!
- 3** Neural Networks Referees in 2007
- 5** Neural networks editorial board addresses and specialities
- 12** INNS 2007 award recipients

Neuroscience and Neuropsychology

T. Taniguchi, T. Sawaragi

- 13** Incremental acquisition of multiple nonlinear forward models based on differentiation process of schema model

L. Sivridis, A. Kotini, P. Anninos

- 28** The process of learning in neural net models with Poisson and Gauss connectivities

Mathematical and Computational Analysis

N.Y. Nikolaev, L.M. de Menezes

- 36** Sequential Bayesian kernel modelling with non-Gaussian noise

K. Hagiwara, K. Fukumizu

- 48** Relation between weight size and degree of over-fitting in neural network regression

K. Patan

- 59** Approximation of state-space trajectories by locally recurrent globally feed-forward neural networks

Engineering and Design

S. Kirstein, H. Wersing, E. Körner

- 65** A biologically motivated visual memory architecture for online learning of objects

Technology and Applications

J.F. Pinto da Costa, H. Alonso, J.S. Cardoso	78	The unimodal model for the classification of ordinal data
H. Fröhlich, A. Hoenselaar, J. Eichner, H. Rosenbrock, G. Birk, A. Zell	92	Automated classification of the behavior of rats in the forced swimming test with support vector machines
S. Wang, D.L. Yu	102	Adaptive RBF network for parameter estimation and stable air–fuel ratio control
	I	Current Events
	III	INNS/ENNS/JNNS–Membership Application Form
	IV	Instructions to Authors

Volume 21, Number 2–3

March/April 2008

CONTENTS**2008 Special Issue: Advances in Neural Networks Research: IJCNN '07**

D.G. Brown, J. Si, R. Sun	113	Special Issue on Advances in Neural Networks Research: IJCNN'07
----------------------------------	------------	---

Artificial Neural Networks

G. He, M.D. Shrimali, K. Aihara	114	Threshold control of chaotic neural network
V. Lanza, F. Corinto, M. Gilli	122	On the study of cellular nonlinear networks via amplitude and phase dynamics
G. Noriega	130	Modeling propagation delays in the development of SOMs — a parallel with abnormal brain growth in autism
H. Torikai, A. Funew, T. Saito	140	Digital spiking neuron and its learning for approximation of various spike-trains
J. Weng, T. Luwang, H. Lu, X. Xue	150	Multilayer in-place learning networks for modeling functional layers in the laminar cortex
H. Yin	160	On multidimensional scaling and the embedding of self-organising maps

Machine Learning

C. Alzate, J.A.K. Suykens	170	A regularized kernel CCA contrast function for ICA
R. Chang, W. Brauer, M. Stetter	182	Modeling semantics of inconsistent qualitative knowledge for quantitative Bayesian network inference
E. Mizutani, S.E. Dreyfus	193	Second-order stagewise backpropagation for Hessian-matrix analyses and investigation of negative curvature
V. Pestov	204	An axiomatic approach to intrinsic dimension of a dataset
Y. Wu, X. Liu, W. Mio	214	Learning representations for object classification using multi-stage optimal component analysis

J.-W. Xu, H. Bakardjian, A. Cichocki,
J.C. Principe

222 A new nonlinear similarity measure for multichannel signals

Z. Yang, J. Laaksonen

232 Principal whitened gradient for information geometry

Natural Systems, Cognitive Science, and Cognitive Modeling

A. Farajidavar, S. Saeb, K. Behbehani

241 Incorporating synaptic time-dependent plasticity and dynamic synapse into a computational model of wind-up

J.F. Fontanari, L.I. Perlovsky

250 How language can help discrimination in the Neural Modelling Fields framework

W.J. Freeman

257 A pseudo-equilibrium thermodynamic model of information processing in nonlinear brain dynamics

N. Kasabov, V. Jain, L. Benuskova

266 Integrating evolving brain–gene ontology and connectionist-based system for modeling and knowledge discovery

R.A. Koene, M.E. Hasselmo

276 Reversed and forward buffering of behavioral spike sequences enables retrospective and prospective retrieval in hippocampal regions CA3 and CA1

T. Matsuka, Y. Sakamoto,
A. Chouchourelou

289 Modeling a flexible representation machinery of human concept learning

C. Molter, Y. Yamaguchi

303 Impact of temporal coding of presynaptic entorhinal cortex grid cells on the formation of hippocampal place fields

G. Piccinini

311 Some neural networks compute, others don't

A. Ponzi

322 Dynamical model of salience gated working memory, action selection and reinforcement based on basal ganglia and dopamine feedback

K. Shimonomura, T. Kushima, T. Yagi

331 Binocular robot vision emulating disparity computation in the primary visual cortex

Y. Xiao, R. Rao, G. Cecchi, E. Kaplan

341 Improved mapping of information distribution across the cortical surface with the support vector machine

Applications

H. Aomori, T. Otake, N. Takahashi,
M. Tanaka

349 Sigma–delta cellular neural network for 2D modulation

S. Chen, A. Wolfgang, C.J. Harris,
L. Hanzo

358 Adaptive nonlinear least bit error-rate detection for symmetrical RBF beamforming

A. Ciaramella, S. Coccozza, F. Iorio,
G. Miele, F. Napolitano, M. Pinelli,
G. Raiconi, R. Tagliaferri

368 Interactive data analysis and clustering of genomic data

A.G. Floares

379 A reverse engineering algorithm for neural networks, applied to the subthalamo-pallidal network of basal ganglia

B.D. Gallas, D.G. Brown

387 Reader studies for validation of CAD systems

J.J. Huseynov, S.B. Baliga, A. Widmer,
Z. Boger

398 An adaptive method for industrial hydrocarbon flame detection

Q. Liu, J. Wang

406 Two *k*-winners-take-all networks with discontinuous activation functions

P.J.G. Lisboa, T.A. Etchells, I.H. Jarman, M.S. Hane Aung, S. Chabaud, T. Bachelot, D. Perol, T. Gargi, V. Bourdès, S. Bonnevey, S. Négrier	414	Time-to-event analysis with artificial neural networks: An integrated analytical and rule-based study for breast cancer
M.A. Mazurowski, P.A. Habas, J.M. Zurada, J.Y. Lo, J.A. Baker, G.D. Tourassi	427	Training neural network classifiers for medical decision making: The effects of imbalanced datasets on classification performance
F. Ojeda, J.A.K. Suykens, B. De Moor	437	Low rank updated LS-SVM classifiers for fast variable selection
X. Peng, I. King	450	Robust BMPM training based on second-order cone programming and its application in medical diagnosis
D.V. Prokhorov	458	Toyota Prius HEV neurocontrol and diagnostics
W. Qiao, G.K. Venayagamoorthy, R.G. Harley	466	Optimal wide-area monitoring and nonlinear adaptive coordinating neurocontrol of a power system with wind power integration and multiple FACTS devices
B. Sahiner, H.-P. Chan, L. Hadjiiski	476	Classifier performance estimation under the constraint of a finite sample size: Resampling schemes applied to neural network classifiers
D. Srinivasan, V. Sharma, K.A. Toh	484	Reduced multivariate polynomial-based neural network for automated traffic incident detection
B.D. Thompson, M.R. Azimi-Sadjadi	493	Iterative multi-channel coherence analysis with applications
Y.-C.F. Wang, D. Casasent	502	New support vector-based design method for binary hierarchical classifiers for multi-class classification problems
Hardware		
B. Schrauwen, M. D'Haene, D. Verstraeten, J. Van Campenhout	511	Compact hardware liquid state machines on FPGA for real-time speech recognition
J.H.B. Wijekoon, P. Dudek	524	Compact silicon neuron circuit with spiking and bursting behaviour
Cross Disciplinary Topics		
V.M. Krasnopolsky, M.S. Fox-Rabinovitz, H.L. Tolman, A.A. Belochitski	535	Neural network approach for robust and fast calculation of physical processes in numerical environmental models: Compound parameterization with a quality control of larger errors
Special Competitions		
I. Guyon, A. Saffari, G. Dror, G. Cawley	544	Analysis of the IJCNN 2007 agnostic learning vs. prior knowledge challenge
	I	INNS/ENNS/JNNS–Membership Application Form
	II	Instructions to Authors

CONTENTS
2008 Special Issue: Robotics and Neuroscience

S. Schaal, Y. Nakamura, P. Dario	551	Special issue on robotics and neuroscience
---	------------	--

J.L. McKinstry, A.K. Seth, G.M. Edelman, J.L. Krichmar	553	Embodied models of delayed neural responses: Spatiotemporal categorization and predictive motor control in brain based devices
C. Faubel, G. Schöner	562	Learning to recognize objects on the fly: A neurally based dynamic field approach
R. Ronsse, P. Lefèvre, R. Sepulchre	577	Robotics and neuroscience: A rhythmic interaction
J. Tani, R. Nishimoto, R.W. Paine	584	Achieving “organic compositionality” through self-organization: Reviews on brain-inspired robotics experiments
C. Smith, M. Bratt, H.I. Christensen	604	Teleoperation for a ball-catching task with significant dynamics
A. Mahboobin, P.J. Loughlin, M.S. Redfern, S.O. Anderson, C.G. Atkeson, J.K. Hodgins	621	Sensory adaptation in human balance control: Lessons for biomimetic robotic bipeds
B. Girard, N. Tabareau, Q.C. Pham, A. Berthoz, J.-J. Slotine	628	Where neuroscience and dynamic system theory meet autonomous robotics: A contracting basal ganglia model for action selection
A.J. Ijspeert	642	Central pattern generators for locomotion control in animals and robots: A review
S. Au, M. Berniker, H. Herr	654	Powered ankle-foot prosthesis to assist level-ground and stair-descent gaits
C. Maufroy, H. Kimura, K. Takase	667	Towards a general neural controller for quadrupedal locomotion
J. Peters, S. Schaal	682	Reinforcement learning of motor skills with policy gradients
	698	Publisher’s note
	I	INNS/ENNS/JNNS–Membership Application Form
	II	Instructions to Authors

CONTENTS

Neuroscience and Neuropsychology

W. Gnadt, S. Grossberg	699	SOVEREIGN: An autonomous neural system for incrementally learning planned action sequences to navigate towards a rewarded goal
G.-E. La Cara, M. Ursino	759	A model of contour extraction including multiple scales, flexible inhibition and attention
K. Fukushima	774	Extraction of visual motion and optic flow

Mathematical and Computational Analysis

P. Auer, H. Burgsteiner, W. Maass	786	A learning rule for very simple universal approximators consisting of a single layer of perceptrons
	I	Current Events
	IV	INNS/ENNS/JNNS–Membership Application Form
	V	Instructions to Authors

CONTENTS

2008 Special Issue: Computational and Biological Inspired Neural Networks, selected papers from ICANN 2007

D. Mandic, W. Duch	797	Preface
Y. Asai, A. Guha, A.E.P. Villa	799	Deterministic neural dynamics transmitted through neural networks
F.J. Veredas, H. Mesa, L.A. Martínez	810	Imprecise correlated activity in self-organizing maps of spiking neurons
E. Magosso, C. Cuppini, A. Serino, G. Di Pellegrino, M. Ursino	817	A theoretical study of multisensory integration in the superior colliculus by a neural network model
S. McGregor	830	Further results in multiset processing with neural networks
J. Grim, J. Hora	838	Iterative principles of recognition in probabilistic neural networks
Y. Wu, C. Fyfe, P.L. Lai	847	Two forms of immediate reward reinforcement learning for exploratory data analysis
M. Robinson, C. González Castellano, F. Rezwan, R. Adams, N. Davey, A. Rust, Y. Sun	856	Combining experts in order to identify binding sites in yeast and mouse genomic data
E.A. Antonelo, B. Schrauwen, D. Stroobandt	862	Event detection and localization for small mobile robots using reservoir computing
G. Grossi, F. Pedersini	872	FPGA implementation of a stochastic neural network for monotonic pseudo-Boolean optimization
	I	INNS/ENNS/JNNS—Membership Application Form
	II	Instructions to authors

CONTENTS

Neuroscience and Neuropsychology

V. Logar, A. Belič, B. Koritnik, S. Brežan, J. Zidar, R. Karba, D. Matko	881	Using ANNs to predict a subject's response based on EEG traces
S.M. Stringer, E.T. Rolls	888	Learning transform invariant object recognition in the visual system with multiple stimuli present during training

Mathematical and Computational Analysis

I. Olier, A. Vellido	904	Advances in clustering and visualization of time series using GTM through time
J.-M. Wu, M.-H. Chen, Z.-H. Lin	914	Independent component analysis based on marginal density estimation using weighted Parzen windows
S. Buchholz, G. Sommer	925	On Clifford neurons and Clifford multi-layer perceptrons
R. Mtibaa, M. Idesawa, Y. Sakaguchi, F. Ishida	936	A computational model of perceptual grouping and 3D surface completion in the mime effect

S. Issanchou, J.-P. Gauchi	945	Computer-aided optimal designs for improving neural network generalization
C. Hervás-Martínez, F.J. Martínez-Estudillo, M. Carbonero-Ruz	951	Multilogistic regression by means of evolutionary product-unit neural networks
J. Demongeot, S. Sené	962	Boundary conditions and phase transitions in neural networks. Simulation results
J. Demongeot, C. Jézéquel, S. Sené	971	Boundary conditions and phase transitions in neural networks. Theoretical results
K. Nagata, S. Watanabe	980	Asymptotic behavior of exchange ratio in exchange Monte Carlo method
H. Wei, S.-i. Amari	989	Dynamics of learning near singularities in radial basis function networks

Engineering and Design

J. Cano-Izquierdo, J. Ibarrola, M. Pinzolas, M. Almonacid	1006	dNSP: A biologically inspired dynamic Neural network approach to Signal Processing
K. Odajima, Y. Hayashi, G. Tianxia, R. Setiono	1020	Greedy rule generation from discrete data and its use in neural network rule extraction

Technology and Design

N. Mammone, F.C. Morabito	1029	Enhanced automatic artifact detection based on independent component analysis and Renyi's entropy
----------------------------------	-------------	---

Neural Networks Letters

S. Hélie	1041	Energy minimization in the nonlinear dynamic recurrent associative memory
	I	Current Events
	III	INNS/ENNS/JNNS—Membership Application Form
	IV	Instructions to authors
	VIII	Call for papers

CONTENTS

2008 Special Issue: Neuroinformatics

J.G. Bjaalie, S. Grillner, S. Usui	1045	Neuroinformatics: Databases, tools, and computational modeling for studying the nervous system
T. Kazawa, H. Ikeno, R. Kanzaki	1047	Development and application of a neuroinformatics environment for neuroscience and neuroethology
A. Sato, Y. Sekine, C. Saruta, H. Nishibe, N. Morita, Y. Sato, T. Sadakata, Y. Shinoda, T. Kojima, T. Furuichi	1056	Cerebellar development transcriptome database (CDT-DB): Profiling of spatio-temporal gene expression during the postnatal development of mouse cerebellum
A.V.M. Herz, R. Meier, M.P. Nawrot, W. Schiegel, T. Zito	1070	G-Node: An integrated tool-sharing platform to support cellular and systems neurophysiology in the age of global neuroinformatics

M. Fletcher, B. Liang, L. Smith, A. Knowles, T. Jackson, M. Jessop, J. Austin	1076	Neural network based pattern matching and spike detection tools and services – in the CARMEN neuroinformatics project
R. Meier, U. Egert, A. Aertsen, M.P. Nawrot	1085	FIND – A unified framework for neural data analysis
J. Cui, L. Xu, S.L. Bressler, M. Ding, H. Liang	1094	BSMART: A MATLAB/C toolbox for analysis of multichannel neural time series
X. Li, J.G.R. Jefferys, J. Fox, X. Yao	1105	Neuronal population oscillations of rat hippocampus during epileptic seizures
J.-A. Ting, A. D'Souza, K. Yamamoto, T. Yoshioka, D. Hoffman, S. Kakei, L. Sergio, J. Kalaska, M. Kawato, P. Strick, S. Schaal	1112	Variational Bayesian least squares: An application to brain–machine interface data
G. Bezgin, E. Wanke, A. Krumnack, R. Kötter	1132	Deducing logical relationships between spatially registered cortical parcellations under conditions of uncertainty
B. Aisa, B. Mingus, R. O'Reilly	1146	The Emergent neural modeling system
R. Scorcioni, D.J. Hamilton, G.A. Ascoli	1153	Self-sustaining non-repetitive activity in a large scale neuronal-level model of the hippocampal circuit
M. de Kamps, V. Baier, J. Drever, M. Dietz, L. Mösenlechner, F. van der Velde	1164	The state of MIIND
W. Huang, L. Jiao, J. Jia	1182	Modeling contextual modulation in the primary visual cortex
K. Shimonomura, T. Yagi	1197	Neuromorphic VLSI vision system for real-time texture segregation
A. Naud, S. Usui	1205	Exploration of a collection of documents in neuroscience and extraction of topics by clustering
	I	INNS/ENNS/JNNS—Membership Application Form
	II	Instructions to authors

CONTENTS

Neural Networks Letters

G. Mengov, H. Egbert, S. Pulov, K. Georgiev	1213	Emotional balances in experimental consumer choices
A. Laflamme-Sanders, M. Zhu	1220	LAGO on the unit sphere

Neuroscience and Neuropsychology

Y. Yamashita, M. Takahasi, T. Okumura, M. Ikebuchi, H. Yamada, M. Suzuki, K. Okanoya, J. Tani	1224	Developmental learning of complex syntactical song in the Bengalese finch: A neural network model
L. Rubinsky, N. Raichman, J. Lavee, H. Frenk, E. Ben-Jacob	1232	Spatio-temporal motifs 'remembered' in neuronal networks following profound hypothermia

K. Schindler, L. Van Gool, B. de Gelder	1238	Recognizing emotions expressed by body pose: A biologically inspired neural model
K.H. Brodersen, W.D. Penny, L.M. Harrison, J. Daunizeau, C.C. Ruff, E. Duzel, K.J. Friston, K.E. Stephan	1247	Integrated Bayesian models of learning and decision making for saccadic eye movements

Mathematical and Computational Analysis

S. Satoh, S. Usui	1261	Computational theory and applications of a filling-in process at the blind spot
J.J. Torres, J. Marro, J.M. Cortes, B. Wemmenhove	1272	Instabilities in attractor networks with fast synaptic fluctuations and partial updating of the neurons activity
M. Sugiyama, N. Rubens	1278	A batch ensemble approach to active learning with model selection
H. Amadou Boubacar, S. Lecoeuche, S. Maouche	1287	SAKM: Self-adaptive kernel machine A kernel-based algorithm for online clustering
L.M. Silva, J. Marques de Sá, L.A. Alexandre	1302	Data classification with multilayer perceptrons using a generalized error function
L. Ait Gougam, M. Tribeche, F. Mekideche-Chafa	1311	A systematic investigation of a neural network for function approximation
Q. Wu, T.M. McGinnity, L. Maguire, A. Belatreche, B. Glackin	1318	2D co-ordinate transformation based on a spike timing-dependent plasticity learning mechanism

Engineering and Design

R. Linsker	1328	Neural network learning of optimal Kalman prediction and control
N. García-Pedrajas, D. Ortiz-Boyer	1344	Boosting random subspace method
F.L. Minku, T.B. Ludermer	1363	Clustering and co-evolution to construct neural network ensembles: An experimental study

Technology and Applications

N. Srinivasa, S. Grossberg	1380	A head–neck–eye system that learns fault-tolerant saccades to 3-D targets using a self-organizing neural model
L. Wu, P. Baldi	1392	Learning to play Go using recursive neural networks
S. Park, S. Choi	1401	A constrained sequential EM algorithm for speech enhancement
E.D. Übeyli	1410	Implementing eigenvector methods/probabilistic neural networks for analysis of EEG signals
E. Mizutani, S.E. Dreyfus	1418	Corrigendum to: “Second-order stagewise backpropagation for Hessian-matrix analyses and investigation of negative curvature” [Neural Netw. 21 (2–3) (2008) 193–203]
